MessageSolution Expands its Global Partnership Network, Exhibiting at Microsoft Worldwide Partner Conference 2012

MessageSolution, the global technology leader in enterprise information archiving and eDiscovery, will be extending its alliance with Microsoft global partners and exhibiting its award-winning On-Premise, Cloud, & MSP Hosted Platforms at the Microsoft Worldwide Partner Conference 2012 in Toronto, Canada July 9 - 12, 2012

Toronto Canada and Milpitas, CA (July 9, 2012)

MessageSolution, Inc., the global technology leader in enterprise information archiving & eDiscovery solutions, extends its alliance with Microsoft global partners and showcases its enterprise legal discovery, information archiving and migration solutions at Microsoft's Worldwide Partner Conference (WPC) in Toronto Canada on July 9 - 12, 2012.

As the only vendor that delivers 3 award-winning information archiving and eDiscovery solution platforms, MessageSolution offers an on-premise enterprise solution for companies that prefer onsite implementation, a cloud computing hosted service for organizations of all sizes, and an MSP hosted archiving and eDiscovery platform, paving the way for MSP (managed service providers) partners to host and manage clients. The international program includes managed service providers (MSP), internet service providers (ISP), and value added resellers (VAR). More and more partners choose MessageSolution for their deployment flexibility and the most extensive revenue opportunity for partners in the archiving and eDiscovery market.

 "Partners around the world have signed up with MessageSolutionfor flexibility and scalability we provide, while most other vendors would support hosted service or on-premise solution only, leaving significant numbers of business opportunities that cannot be supported" said Global Marketing Strategist Kevin McInerney. "MessageSolution Cloud, On-Premise and MSP hosted solutions offer our partners the most revenue opportunities when representing us, and meeting the informational archiving and legal discovery needs for customers of all sizes, ether their data are being managed onsite, or in Microsoft 365 Cloud, or hosted by other cloud services."

MessageSolution offers a duality of cloud environments for SME and enterprises. MessageSolution Cloud Computing Platform can also be hosted by managed service providers (MSP) to build and brand in the MSP's own network to leverage the established datacenter or cloud infrastructure. MessageSolution's private cloud solution delivers a complete suite of email, SharePoint and file system archiving, in addition to legal discovery and multiple case management functionalities.

Enterprise SharePoint Archiving and eDiscovery Platform for both on-premise SharePoint servers and MOSS setting: MessageSolution SharePoint Management Solution is integrated with Microsoft RBS and EBS protocol ensuring 100% SharePoint performance. Clients in the educational industry can implement MessageSolution to enhance internal performance and storage management. In addition to an on-premise enterprise solutios deployed on their clients' site, MessageSolution enterprise email archiving and eDiscovery platforms are integrated with Amazon EC2, OpSource Cloud, HP Cloud, IBM SmartCloud for Exchange, Domino, GroupWise, and all Linux-based email environments. MessageSolution hosted cloud archiving allows businesses to implement a best-of-

breed archiving eDiscovery solution in record time with minimal upfront costs and comprehensive enterprise features.

MSP Multi-Tenant and Dedicated Platforms: MessageSolution expanded its award-winning on-premise archiving solution to two platform based solutions for managed service providers. At WPC 2012, MessageSolution will be showcasing its MSP Multi-Tenant Archiving Platform in addition to the Dedicated Archiving and eDiscovery Platform which combines scalability and technology to archive and store tens of thousands of users from hundreds of companies with individual archives. The MSP Multi-Tenant Platform allows multiple companies to be archived under one configuration, while giving company administrators under separate servers the ability to access, manage and archive a single company's data. The MSP Multi-Tenant Platform is integrated with Outlook, Domino, GroupWise client seamless integrated features, providing award-winning transparent client user experiences with real-time email server storage reduction capability.

Data Migration: MessageSolution, Inc. has been recognized as the technology leader in cross-platform migration across different email, file, and SharePoint environments. The migration systems offer three levels of migration - the email migration of PST, NSF and GroupWise local files, the migration of various files to SharePoint, and the advanced migration service moves organizations from GroupWise/Domino/Linux-based servers to on-premise Microsoft Exchange as well as Office 365 cloud environment. In addition to moving organizations from GroupWise or Domino to Exchange, MessageSolution's signature technology is found in combination of migration and enterprise archiving with eDiscovery.

 "We're excited to work with a growing number of global Microsoft partners to support their clients around the world for their email and data archiving for compliance, legal discovery, and storage management." said McInerney. "MessageSolution's architecture is designed for online global deployment with minimum engineering support and easy to deploy, which helped MessageSolution's technology being deployed at its fastest growth rate in the market today, both on-premise and in the cloud".

As a technology leader in the industry, MessageSolution has achieved the following:

- Fully support Outlook 2011 Mac Entourage (the first Outlook 2011 integration in the market)
- Microsoft Cloud-Ready, fully support Exchange 2010, Domino and GroupWise 7.0 onward, Office 365 and Google Apps hosted email services (Exchange 2010 Web Service Protocol Integration for both On-Premise and Cloud Archiving & eDiscovery implementations), with "0" footprint on Exchange, Domino and GroupWise and consuming "0" resource on email servers for transparent offloaded data retrieval.
- Providing a complete on-premise and cloud-based solution for advanced enterprise archiving and eDiscovery needs, MessageSolution's specialty ranges across all email platforms, including Microsoft Exchange 5.5 to Exchange 2010, SharePoint 2007 – 2010, File Systems; IBM Lotus Notes Domino 6.5 upwards, Novell GroupWise 7.0+, and Linux-based email platforms such Postfix, Zimbra, Kerio, Scalix, Kero, etc, and the hosted email services such as Microsoft Office 365 and Google Apps, etc
- Fully support Windows Server 2008 64-bit Platform for Email, SharePoint, and File Systems (the first in the market 64-bit enterprise-class archiving application), as well as Linux-based archiving server configuration

MessageSolution™

MessageSolution will be exhibiting at Microsoft Worldwide Partner Conference in Boston Toronto Convention Center, Canada, July 9 - 12, 2012.
