

## **MESSAGESOLUTION ENTERPRISE ARCHIVE AND E-DISCOVERY SUITE VOTED 2010 MSEXCHANGE.ORG READERS' CHOICE AWARD WINNER**

August 26, 2010, – Leading Microsoft Exchange Server resource site, MExchange.org, and MessageSolution, Inc. in Silicon Valley, California, announced today that MessageSolution Enterprise Archive and E-Discovery Suite was selected the winner in the Email Archiving category of the MExchange.org Readers' Choice Awards.

"Our Reader's Choice Awards give visitors to our site the opportunity to vote for the products they view as the very best in their respective category," said Sean Buttigieg, MExchange.org manager. "MExchange.org users are specialists in their field who encounter various solutions for Exchange Server at the workplace. Their vote serves as a solid peer-to-peer recommendation of the winning product."

*MExchange.org* conducts regular polls to discover which product is preferred by Exchange administrators in a particular category of third party solutions for Microsoft Exchange Server. The awards draw a huge response per category and are based entirely on the visitors' votes. MExchange.org users can submit their votes for the current Readers' Award poll in the site's left-hand bar.

"It is our honor to be voted as the best in class archiving and e-Discovery solution for Exchange Server by Exchange administrators and users on MExchange.org," said Kevin Mcinerney, Global Marketing Strategist at MessageSolution. "This is the second year MessageSolution has won this annual award, which shows that our unified user interface for email, SharePoint and file systems with Exchange 2010 Web Services Integration has delivered a world-class archiving and e-Discovery solution while providing the most responsive global online support. We will continue developing and applying our leading-edge technologies in our solutions and providing the best services for Exchange administrators and users around the world."

### **About MessageSolution Enterprise Archive and E-Discovery Suite**

MessageSolution, Inc., the global technology leader in live archiving for email, file systems, SharePoint, and OCS for electronic discovery and litigation support, compliance, storage management, and email server migrations, provides organizations around the world with both in-house and Software as a Service (SaaS) archiving and e-Discovery solutions. The first in-house and SaaS archiving provider in the market to fully integrate with Exchange 2010 Web Services (EWS), MessageSolution delivers an all-in-one, integrated cloud-based enterprise information archiving (EIA) solution for email, file systems, and

ISV/Software Solutions

SharePoint. As the most robust, scalable and high performance industry standard platform, Exchange 2010 Web Services effectively enables MessageSolution's scalability record-setting archiving solution to massively scale to collect all data and the full set of metadata, supplying corporate legal counsel with a thorough, in-depth e-discovery system. The Exchange 2010 EWS also allows MessageSolution to leverage its cross-platform capability to fully support managed services providers' (MSP) Linux OS requirements and multi-tenant environments in their data centers.

Along with archiving and e-Discovery, MessageSolution Enterprise Migration System helps organizations migrate between email servers, such as GroupWise or Domino to Exchange bi-directional and SharePoint or BPOS migration from multiple source systems.

MessageSolution is the first in the market to perform simultaneous mail server migration, archiving, and stubbing in one streamlined process, singularly meeting organizations' requirements for email server migration and archiving for compliance, server storage management, e-discovery, and litigation support. MessageSolution also became the first archiving vendor in the market to deliver a true 64-bit application that runs on a 64-bit OS machine.

### **About MExchange.org**

MExchange.org (<http://www.msexchange.org>) is a Microsoft Exchange Server 2007/2003/2000 resource site. It is the leading Exchange site, attracting over 350,000 Exchange administrators and specialists a month. The site provides the latest Microsoft Exchange Server news, articles and tutorials by leading Exchange experts, message boards, software listings and product reviews.

MExchange.org forms part of a group of sites run by TechGenix Ltd., including <http://www.windowsnetworking.com> - a comprehensive Windows Networking resource site; <http://www.isaserver.org>, a Microsoft ISA Server resource site; <http://www.windowsecurity.com>, a Windows security resource site and <http://www.virtualizationadmin.com>, a Server Based Computing resource site.

### **About MessageSolution, Inc.**

MessageSolution is the global technology leader in email, file systems, and SharePoint archiving for electronic discovery, compliance, content storage management, and email server migrations. With products and services delivered both in-house and as Software as a Service (SaaS), MessageSolution enables organizations to mitigate risk, reduce costs and storage requirements, optimize server performance, and comply with industry and federal regulations.

ISV/Software Solutions

Based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Mainland China, along with distribution channels in Europe, Africa, Australia, and Asia Pacific. MessageSolution Enterprise Email Archive, Enterprise File Archive, Enterprise SharePoint Archive, and Enterprise Migration System are on-premise solutions and Software as a Service (SaaS) archiving services implemented for organizations across all industries, including finance, health care, education, manufacturing, government agencies and non-profit organizations worldwide. MessageSolution software frees IT administrators from daily maintenance and increases overall employee productivity.

MessageSolution is actively working with partners around the world to work with global clients of all sizes. Please visit our web site for more information on the Global Partner Network Program.

### **What Differentiates MessageSolution Products**

On-premise and SaaS customers continually emphasize MessageSolution products' excellent overall performance, support of all major email servers, and ease of use combined with a rich feature set. MessageSolution provides sub-second data retrieval, an intuitive interface, and ease of deployment and maintenance. MessageSolution's intelligent back-end design significantly reduces installation requirements, backup time, and the need for technical support.

MessageSolution Enterprise Email Archive™ deftly manages petabytes of data daily, a powerful enterprise archiving and e-Discovery solution. Electronic discovery and litigation support are empowered by the archive's built-in search engine, which searches through millions of emails within seconds across global locations and data centers. Users can access their archive through their email client, browser, or BlackBerry.

As MessageSolution's on-premise, SaaS and Hybrid Archiving supports all major email servers, including Microsoft Exchange Server, IBM Lotus Domino Server, Novell Groupwise Server, Scalix, Kerio, Postfix, Postpath, Zimbra, Imail, Qmail, Sendmail, MDAemon and Sun server, etc., as well as delivering archiving for SharePoint, and for file systems on NST/NFS/NSS/Netware. MessageSolution Enterprise Archive Suite is also the first archiving solution and service in the market to simultaneously cross-support archiving for all compatible mail servers.

In the first quarter of 2009, MessageSolution became the first archiving vendor in the market to deliver a true 64-bit application that runs on a 64-bit OS machine. In November 2009, MessageSolution delivered the first archiving and e-Discovery solution with full Exchange 2010 Web Services Integration.

MessageSolution delivers the industry's highest enterprise-class scalability and holds the industry record of archiving tens of thousands of users on one single MessageSolution archive server, 5-8 times over competitions. Competitive vendors archive on average 3,000-5,000 users on a single archive server, much less than MessageSolution archiving system's scalability and flexibility. A high in-process compression rate combined with Single Instance Storage (SIS) de-duplication of message, attachment and file archiving slows archive storage growth.

MessageSolution Enterprise Archive Suite™ further reduces organizations' storage costs by using only 25% of the original mail server storage space for live content archiving. MessageSolution's products support all Latin-based languages, as well as all character-based languages, such as Japanese and Chinese.
