MessageSolution Continues its Innovation in Email Server Migration Technology, Reduces Migration Time By 75% from GroupWise or Domino to Exchange

<u>Las Vegas, Nevada, November 2, 2010, and Silicon Valley, California</u> -- MessageSolution, Inc., the global technology leader in email, file systems, and SharePoint/Quickr archiving for electronic discovery, litigation support, compliance, storage management, and email server migrations, today unveils the next-generation in email server migration technology at Microsoft WinConnections Expo 2010.

MessageSolution Enterprise Email Migration System delivers high speed email platform migration and saves 75% of the time needed to complete the email server migration process from GroupWise or Domino to Exchange compared to the time required by other migration vendors.

"MessageSolution's breakthrough email platform migration technology revolutionizes email server migrations, maximizes MessageSolution migration capacity, and saves 75% of the project time competitors' migration systems require," said Kevin McInerney, Global Marketing Strategist at MessageSolution. "Organizations of all sizes, including enterprises with tens of thousands of email users or SME with hundreds of email users, can benefit from MessageSolution's high speed migration system".

With the traditional migration approach, organizations performing email platform migration often face a time and resource-consuming task . MessageSolution migration technology establishes an industry milestone by completing high-speed email migration processes in approximately 25% of the time required by traditional migration products.

MessageSolution's migration and archiving multi-functional technologies can also help organizations with both email migration and email archiving multi-project requirements. Enterprise customers that utilize traditional migration and

BlackBerry.

archiving solutions frequently find it takes months to complete the first step (migration), then an equal amount of time to complete the second step (archiving), concluding with the final step (stubbing when necessary). This three-stage project can ultimately turn into a year-long project, imposing at least two sets of heavy software licensing and engineering service costs. MessageSolution Enterprise Migration System delivers email server migration, email archiving, indexing and stubbing in an all-in-one process, saving project time and significantly reducing cost.

MessageSolution Enterprise Migration System also helps organizations ' migration requirements for various environments including BPOS, SharePoint, GoogleApps, etc.

As a Microsoft Gold Partner, MessageSolution will be exhibiting at WinConnections 2010 in the exhibition hall at booth # 423 at the Mandalay Bay Convention Center from November 1 – 4, in Las Vegas, Nevada.

About MessageSolution, Inc.
MessageSolution is the global technology leader in email, file system, and SharePoint archiving for electronic discovery, compliance, content storage management, and email server migrations. With products and services delivered both on-premise and as Software as a Service (SaaS), MessageSolution enables organizations to mitigate risk, reduce costs and storage requirements, optimize server performance, and comply with industry and federal regulations. Based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Mainland China, along with distribution channels in Europe, Africa, Australia, and Asia Pacific.

MessageSolution Enterprise Email Archive, Enterprise File Archive, Enterprise SharePoint Archive, and Enterprise Migration System are on-premise solutions and Software as a Service (SaaS) archiving services implemented for organizations across all industries, including finance, health care, education, manufacturing, government agencies and non-profit organizations worldwide. MessageSolution software frees IT administrators from daily maintenance and increases overall employee productivity. For more information, visit http://www.MessageSolution.com.

MessageSolution is actively working with partners around the world to work with global clients of all sizes. Please visit our web site for more information on the Global Partner Network Program.

What Differentiates MessageSolution Products
On-premise and SaaS customers continually emphasize MessageSolution products' excellent overall performance, support of all major email servers, and ease of use combined with a rich feature set. MessageSolution provides sub-second data retrieval, an intuitive interface, and ease

of deployment and maintenance. MessageSolution's intelligent back-end design significantly reduces installation requirements, backup time, and the need for technical support.

MessageSolution Enterprise Email Archive™ deftly manages petabytes of data daily, a powerful enterprise archiving solution. Electronic discovery and litigation support are empowered by the archive's built-in search engine, which searches through millions of emails within seconds across global locations and data centers. Users can access their archive through their email client, browser, or BlackBerry.

In the first quarter of 2009, MessageSolution became the first archiving vendor in the market to deliver a true 64-bit application that runs on a 64-bit OS machine.

MessageSolution delivers the industry's highest enterprise-level scalability and holds the industry record of archiving tens of thousands of users on one single MessageSolution archive server, 5-8 times over competitions. Competitive vendors archive on average 3,000-5,000 users on a single archive server, much less than MessageSolution archiving system's scalability and flexibility. A high in-process compression rate combined with Single Instance Storage (SIS) de-duplication of message, attachment and file archiving slows archive storage growth.

MessageSolution Enterprise Archive Suite™ further reduces organizations' storage costs by using only 25-30% of the original mail server storage space for live content archiving. MessageSolution's products support all Latin-based languages, as well as all character-based languages, such as Japanese and Chinese.
