# MessageSolution Awards Global Partners for Superior Worldwide Enterprise, Government, and Education Channel Sales and Support at Lotusphere 2011

*MessageSolution Global Partner Network continues its rapid growth. Company commits resources for regional exhibitions in bid to expand market share in Enterprise Information Archiving (EIA), eDiscovery, and Email Cross-Platform Migrations*

**<u>Orlando, Florida, January 31, 2011</u>**-- MessageSolution, Inc., an IBM Advanced Business Partner and global technology leader in enterprise email, file systems, SharePoint/Quickr archiving for compliance, eDiscovery, litigation support, storage management, and email cross-platform migrations, announced today the winners of its Global Partner Network at Lotusphere 2011 Expo. These awards are presented to its channel partners that have demonstrated outstanding performance in enterprise, government, and education sales and support during 2010.

MessageSolution's award-winning next generation enterprise archiving and eDiscovery technologies are specifically designed for today's busy enterprise IT and email server administrators. MessageSolution Email Server Cross-Platform Migration System effectively delivers a complete email platform conversion for organizations that are on GroupWise and Domino converting to Exchange or Google platform, with an option of establishing centralized archiving and eDiscovery repository simultaneously.

"MessageSolution Global Partner Network experienced over 182% growth in global markets in 2010," said Kevin McInerney, MessageSolution's Global Marketing Strategist, "and much of this success is due to our channel partner's commitment to engage new accounts and their commitment to support for MessageSolution's enterprise information archiving, eDiscovery solutions, and email cross-platform migration".

 MessageSolution supports all email server platforms with both in-house and Cloud-based archiving and eDiscovery implementations, holds the industry's single-server scalability record of archiving more than 25,000 users, and supports over hundreds of thousands of users in enterprise or datacenter user-based hosted email services with clustered multi-archiving server configurations. MessageSolution delivered the first 64-bit archiving & eDiscovery solution in the market and the first integration with Exchange 2010 Web Services platform. MessageSolution

requires no on-site engineering support for global enterprise multi-location product deployments and on-going maintenance, significantly reducing the cost of engineering service fees and requiring zero training for global partners to start referring MessageSolution to their clients.

Perpetual Connections of Canada is awarded MessageSolution's "Most Engaged Partner of the Year". "MessageSolution has provided my clients with the perfect blend of technology and talent. They offered an email archiving and email cross-platform migration solution that no other company could match, and they delivered it well." said Ted De Vos, President of Perpetual Connections.

MessageSolution's global partners such as Extend Networks from Washington, McGladrey & Caturano from Boston, Dell/ASAP from Texas, Custom Technology in Australia, MXSweep from UK, 365i Technology from the UK, PineApp Ltd from Israel, 3T from Switzerland,  China Digital and MSLong Corporation from China, DTM from Canada, and Knightsbridge & Woods in Singapore, all of who have contributed in acquiring some of MessageSolution's prestigious domestic and international customers.

"I would like to thank the entire MessageSolution team for their support and collaboration. The experience that I have had with MessageSolution has been great." said Richard Ayanbeku, Senior Account Executive from Data Protections and Recovery Ltd. (BDPR) from Nigeria, Africa. "From project initiation to closing, communication and response to issues have been swift.  Customer satisfaction is great, the software is user friendly, and support is around the clock." John Ford of Ford and Associates remarked, "I've enjoyed working with the professional team at MessageSolution this year. "

 MessageSolution recognized Data Protections and Recovery Ltd. (BDPR) from Nigeria with its Most Active Partner of the Year. Ford & Associates of Cuyahoga Falls, Ohio and Capital Network Solutions (CNS) of Sacramento, California were awarded Most Promising Partner of the Year. The Managed Service Provider Partner of the Year Award went to Miller Group of St. Louis, MO.

 "Our Partners honor us with their dedication and we make every effort to recognize their commitment with our innovative technology" continued McInerney, "we are enthusiastic about supporting our partners in promotional events and activities".

MessageSolution will be exhibiting its leading edge new product developments at IBM Lotusphere 2011 in Orlando Florida at booth #705 from January 30 - February 3, 2011, at Novell BrainShare Expo 2011 in Salt Lake City, Utah, as well as at Microsoft TechEd Expo 2011 in Georgia, GA.

Miller Group is one of the earliest managed service provider (MSP) partners and is consistently supporting its Software as a Service (SaaS) SME clients with MessageSolution's multi-tenant datacenter archiving & eDiscovery solutions.

**About MessageSolution, Inc.**

MessageSolution is the global technology leader in email, file system, and SharePoint/Quickr archiving for electronic discovery, compliance, content storage management, and email server migrations. With products and services delivered both on-premise and as Software as a Service (SaaS), MessageSolution enables organizations to mitigate risk, reduce costs and storage requirements, optimize server performance, and comply with industry and federal regulations. Based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Mainland China, along with distribution channels in Europe, Africa, Australia, and Asia Pacific.

MessageSolution Enterprise Email Archive, Enterprise File Archive, Enterprise SharePoint Archive, and Enterprise Migration System are on-premise solutions and Software as a Service (SaaS) archiving services implemented for organizations across all industries, including finance, health care, education, manufacturing, government agencies and non-profit organizations worldwide. MessageSolution software frees IT administrators from daily maintenance and increases overall employee productivity. For more information, visit http://www.MessageSolution.com.

MessageSolution is actively working with partners around the world to work with global clients of all sizes. Please visit our web site for more information on the Global Partner Network Program.

**What Differentiates MessageSolution Products**

On-premise and SaaS customers continually emphasize MessageSolution products' excellent overall performance, support of all major email servers, and ease of use combined with a rich feature set. MessageSolution provides sub-second data retrieval, an intuitive interface, and ease of deployment and maintenance. MessageSolution's intelligent back-end design significantly reduces installation requirements, backup time, and the need for technical support.

MessageSolution Email Cross-Platform Migration System for GroupWise and Domino to Exchange or Google, providing organizations with high-speed email platform conversion with accuracy, migrate mailboxes, calendar, contact and addresses all major business information, with option to establish a corporate archiving and eDiscovery system simultaneously.

MessageSolution Enterprise Email Archive™ deftly manages petabytes of data daily, a powerful enterprise archiving solution. Electronic discovery and litigation support are empowered by the archive's built-in search engine, which searches through millions of emails within seconds across global locations and data centers. Users can access their archive through their email client, browser, or BlackBerry and IPHONE.

In the first quarter of 2009, MessageSolution became the first archiving vendor in the market to deliver a true 64-bit application that runs on a 64-bit OS machine, and subsequently delivered the first in the market Exchange 2010 Web Services integrated archiving and eDiscovery system.

MessageSolution delivers the industry's highest enterprise-level scalability and holds the industry record of archiving over 25,000 users on one single MessageSolution archive server, 5-8 times over competitions; and with clustered archiving system configuration to archive over hundreds of thousands of users in datacenter environment. Competitive vendors archive on average 3,000-5,000 users on a single archive server, much less than MessageSolution archiving system's scalability and flexibility. MessageSolution's in-process compression combined with Single Instance Storage (SIS) de-duplication of message, attachment, file and SharePoint archiving effectively reduces archive storage requirements.

MessageSolution Enterprise Archive Suite™ further reduces organizations' storage costs by using only 25-30% of the original mail server storage space for live content archiving. MessageSolution's products support all Latin-based languages, as well as all character-based languages, such as Japanese and Chinese.
