

## **MessageSolution Releases First in the Market Exchange 2010 Web Services Integration for On-Premise and SaaS Enterprise Information Archiving at Microsoft WinConnections for Exchange 2010**

Las Vegas, Nevada, and Milpitas, California, November 10, 2009 --

MessageSolution, Inc., the global technology leader in email, file system, and SharePoint archiving solutions for electronic discovery, litigation support, compliance, and storage management, today released first in the market Exchange 2010 Web Services Integration at Microsoft WinConnections 2009 in Las Vegas, Nevada.

Microsoft newest Exchange 2010 Web Services platform offers unprecedented scalability, security, robustness, and high performance. It is integrated in MessageSolution's newly released Enterprise Archive Suite 6.0 cross-platform for both on-premise software edition and the Software as a Service (SaaS) edition, where most direct enterprise customers are running Windows operation system, while managed service providers (MSP) such as hosting or backup solution providers, IT consultants, system integrators, Cloud providers and data centers the Linux OS is largely being used.

Microsoft Exchange 2010 Web Services is the industry standard platform which enables

MessageSolution's archiving solution to archive and retrieve email messages, attachment files, and instant messages, and capture all data types as well as the full-set

of metadata in both on-premise and SaaS environment. Capturing all data types offers

enterprise corporate legal councils the complete e-discovery tool that leaves no risk for

litigation scenarios.

Supporting Exchange 2010 Web Services is MessageSolution's new integration development with Microsoft Exchange technology in addition to its support of the Exchange 2007 Web Services protocol.

MessageSolution, a Microsoft Gold Certified Partner, is exhibiting at WinConnections booth 409, and Microsoft Exchange Partner Showcase booth 113, where MessageSolution has been invited by Microsoft to join a select group of partners at the Microsoft Exchange Server Partner Showcase. For more information on MessageSolution Enterprise Email Archive 6.0, visit [www.MessageSolution.com](http://www.MessageSolution.com).

### **About MessageSolution, Inc.**

MessageSolution is the global technology leader in email, file, and SharePoint archiving software for electronic discovery, compliance, and content storage management. MessageSolution enables organizations to mitigate risk, reduce costs and storage requirements, optimize server performance, and comply with industry and federal regulations. Based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Mainland China, along with distribution channels in Europe, Africa, Australia, and Asia Pacific.

MessageSolution Enterprise Email Archive, Enterprise File Archive, and Enterprise SharePoint Archive are on-site and Software as a Service archiving applications serving organizations across all industries, including finance, health care, education, manufacturing, government agencies and non-profit organizations worldwide. MessageSolution software frees IT administrators from daily maintenance and increases overall employee productivity. For more information, visit <http://www.messagesolution.com>.

MessageSolution is actively working with partners around the world to expand its worldwide business presence. Please visit our web site for more information on the Global Partner Network Program.

### **What Differentiates MessageSolution Products**

Customers continually emphasize MessageSolution products' excellent overall performance, support of all major email servers, and ease of use. MessageSolution provides sub-second data retrieval, an intuitive interface, and ease of deployment and maintenance. MessageSolution's intelligent back-end design significantly reduces installation requirements, backup time, and the need for technical support.

MessageSolution Enterprise Email Archive™ deftly manages petabytes of data daily, a powerful enterprise archiving solution. Electronic discovery and litigation support are empowered by the archive's built-in search engine, which searches through millions of emails within seconds across global locations and data centers. Users can access their archive through their email client, browser, or BlackBerry.

In the first quarter of 2009, MessageSolution became the first archiving vendor in the market to deliver a true 64-bit application that runs on a 64-bit OS machine.

ISV/Software Solutions

**Novell.**

**BlackBerry.**

MessageSolution delivers the industry's highest enterprise-level scalability and holds the industry record of archiving 15,000 users on one single MessageSolution archive server. Competitive vendors archive on average 3,000-5,000 users on a single archive server, much less than MessageSolution archiving system's scalability and flexibility. A high in-process compression rate combined with single instance message and attachment archiving slows archive storage growth.

Enterprise Email Archive™ further reduces organizations' storage costs by using only 30% of the original mail server storage space for live content archiving. MessageSolution's products support all Latin-based languages, as well as all character-based languages, such as Japanese and Chinese.
