

MessageSolution Showcases Its Award-Winning Compliance Cloud Archiving and eDiscovery Solutions for Groupwise at BrainShare 2013

MessageSolution, a decade-long Novell technology partner and the global technology leader in enterprise information and cloud archiving, exhibits its award-winning cloud and enterprise solutions at Novell BrainShare 2013 in Salt Lake City, Utah. MessageSolution is the only GroupWise enterprise on-premise archiving software provider featured among the leading vendors in Gartner Magic Quadrant for Enterprise Information Archiving released in December 2012.

Milpitas, CA and Salt Lake City, UT (February 5, 2013): MessageSolution, an established leader in enterprise information archiving and eDiscovery solutions, showcases its integrated archiving and eDiscovery solutions for GroupWise at Novell BrainShare 2013 in Salt Lake City, Utah. As a decade-long Novell technology Partner, MessageSolution was recently featured in Gartner's Magic Quadrant Report and noted as the only vendor to provide cutting-edge GroupWise archiving integration at the enterprise level for both on-premise deployment and cloud archiving implementations.

As an advanced Novell technology partner, MessageSolution provides comprehensive information archiving and eDiscovery platforms designed to complement Novell business solutions. Deployed for both on-premise and cloud implementations, MessageSolution delivers simultaneous archiving for GroupWise, Exchange, Domino, and all major Linux email server environments. Available in the Cloud, or as an on-premise or MSP hosted multi-tenant solution, MessageSolution offers an information archiving and eDiscovery solution for email, SharePoint, and file systems for organizations of all sizes. MessageSolution is also the only vendor to provide full enterprise archiving and eDiscovery feature functionality in the Cloud for SME clients.

Leading analyst firm, Gartner, released its annual Magic Quadrant Report in December of 2012 to identify industry leaders and visionary players in the archiving industry. Solutions are judged based on their technological vision as well as their ability to execute. During an extensive vetting process, analysts studied everything from extensive customer reviews, software demonstrations, business philosophies and more. Out of all the featured solutions, MessageSolution was the only enterprise-class solution provider to offer an on-premise solution for GroupWise archiving and eDiscovery, and deliver full feature functionality in its cloud archiving service.

In addition to being the only enterprise-class archiving software provider for Novell GroupWise clients, the MessageSolution platform is also highlighted for being the only provider that delivers GroupWise archiving and eDiscovery for three unique platforms including: enterprise on-premise, cloud archiving service, and MSP-hosted multi-tenant

archiving for the cloud and data center operations. Alongside the solution's robust feature set, the 2012 Magic Quadrant Report notes that "[the MessageSolution platform is] simple to deploy and manage, and easy to use. Customer satisfaction is high."

MessageSolution also offers clients both Novell eDirectory synchronization and advanced GroupWise integration that optimize system capabilities and enhance user workflow. Administrators can import users, user-groups and access permissions from the eDirectory while integrating an advanced Folder-Link for Outlook users in GroupWise/Exchange mixed environments. Sophisticated email client integration with the GroupWise plug-in empowers users to search and access archived data directly through the GroupWise interface. Seamless user integration allows for policy-based data offloading to reduce storage requirements for Post Offices on the GroupWise server and significantly optimize server performance.

The MessageSolution platform delivers a unified solution which also offers file system and SharePoint archiving and governance, providing eDiscovery and advanced litigation support from one central interface.

In addition to typical archiving features, the MessageSolution platform incorporates advanced eDiscovery functionality into its standard archiving solution. Features include centralized legal hold for email, file, SharePoint data, automated data redaction, case management, data classification, legal/auditor access, delegated searches, PST export tool, and more.

With MessageSolution's Cross-Platform Migration System, organizations can systematically migrate data from Exchange, Domino or legacy GroupWise environments to the most current GroupWise email server. When selecting the high-speed migration option, all data is automatically offloaded from the legacy email server and then archived to streamline multiple tasks in one single process, saving extensive time and costs in data migration and archiving.

MessageSolution exhibits at BrainShare 2013 (Booth #707) from February 4-6 at the Salt Palace Convention Center in Salt Lake City, Utah. At BrainShare, MessageSolution will offer software demos, participate in Novell engineer-led technical integration sessions and training on products from Novell®, NetIQ®, SUSE® and others. The MessageSolution engineering team works directly with Novell engineers for enhanced product development, technical training, GroupWise community networking, etc.
