

MessageSolution Features Medical Image Archiving & eDiscovery At the Health Information Management Systems Society 2014 (HIMSS) in Orlando, Florida

MessageSolution delivers award-winning corporate information archiving and eDiscovery software solutions for email, SharePoint and file system archiving, legal discovery, and storage management. Enhancing its model of controlled self-serve eDiscovery, mitigated legal risk, solution reliability and flexible storage models, MessageSolution introduces medical image archiving for a unified healthcare archiving solution.

Orlando, FL (February 24, 2014) – MessageSolution, an industry leader in enterprise-class archiving and eDiscovery, will be exhibiting at HIMSS 2014, showcasing the addition of medical image archiving to its award-winning, HIPAA-compliant platform.

Available as on-premise and cloud-based solutions, the MessageSolution Medical Image Archive is a DICOM standards based and vendor neutral archive (VNA). It enables centralized image sharing, drastically lowers the storage costs of medical image archiving, reduces PACS upgrade costs and manages image retention. “The addition of Medical Image Archive to MessageSolution’s already robust enterprise information archiving and eDiscovery platform is a game-changer”, states MessageSolution Global Marketing Strategist Kevin McInerney. “It creates a near-perfect archiving solution that deserves the attention of every healthcare organization.”

The MessageSolution Medical Image Archive acts as a hub for centralized medical image sharing and significantly improves the interoperability for the radiology department in clinics, hospitals, and other interactive organizations. Doctors and healthcare professionals from all departments can locate, access and retrieve X-ray study, PET scans, MRIs, etc. within seconds. Doctors can also securely share images and reports online with non-affiliated hospitals or healthcare organizations, to reduce costs of physically shipping. MessageSolution also saves organizations thousands of dollars by reducing the cost on upgrading their PACS (picture archiving and communication systems). The MessageSolution Medical Image Archive provides with the centralized image management solution, saving tens of thousands of dollars on PACS upgrade costs.

MessageSolution also leverages in-process compression and Single-Instance-Storage to reduce storage requirements by up to 75% on the archiving server, depending on the file formats, which represents a significant cost-savings. After compression, data is stored in an easy-to-maintain and secure format (including immutable storage). Data can be offloaded from proprietary storage banks to inexpensive archiving storage. Organizations can granularly manage image retention through the creation of hierarchical retention policies to optimize storage use, improve interoperability, and maintain compliance.

The MessageSolution Platforms deliver turnkey solutions that allow each organization to customize enterprise information archiving, retention and privacy policies to achieve HIPAA compliance. It serves as a centralized, auditable data store for email, SharePoint and file system data. Data is archived in real-time and is automatically retained or (permanently) deleted in accordance with configured retention policies.

MessageSolution delivers highly controlled archive access with multi-tiered access permissions, to protect institutional and patient privacy. Policy-based data redaction can also be configured to protect sensitive information such as patient IDs, credit card numbers, social security numbers, etc for HIPAA or PCI compliance. Detailed logs and configurable reports track archive access, search history, data retrieval, etc. Archived data can also be stored in immutable formats such as Blu-Ray. MessageSolution is also one of the few solution providers to offer compliance monitoring features to assess compliance governance.

MessageSolution will be showcasing its enterprise and cloud-based solutions for enterprise information archiving and eDiscovery at HIMSS 2014 at the Orange County Convention Center in Orlando, FL on February 23-27, 2014.
