

**FOR IMMEDIATE RELEASE**

## **MessageSolution Features Unified Information Archiving and eDiscovery Solution for Service Providers at 2017 HostingCon in Los Angeles, California**

*Partnering with global service providers, MessageSolution continues expanding its global footprints with award winning service provider information archiving and eDiscovery platforms, delivering managed compliance archiving, legal discovery and storage management for enterprises and organizations' email, file and SharePoint documents*

Los Angeles, CA, April 03, 2017 MessageSolution, the global technology leader in content archiving and eDiscovery, will showcase its award-winning unified archiving and eDiscovery platforms for managed service provider cloud networks and worldwide datacenters at 2017 HostingCon, the U.S. equivalent of World Hosting Day in the Europe.

In addition to delivering service provider hosted platforms, MessageSolution Cloud Archive and eDiscovery platforms are open to integrate with email security and backup providers, leading with a comprehensive blend of features and functionalities in compliance archiving and eDiscovery. In broader market performance, MessageSolution delivers flexibility with three deployment options, including service provider hosted multi-tenant platform, software as service in cloud networks, and on-premise enterprise platforms. MessageSolution is the only provider in the information archiving space that offers all 3 platforms, generating global volume and deployments with affordable solutions for service providers and enterprise end users.

"MessageSolution was the first provider that delivered the trend-setting service provider hosted multi-tenant archiving & eDiscovery platform deployed in our service provider partner's datacenters 7 years ago," says Kevin McNerney, MessageSolution Global Marketing Strategist. "Today, as the technology leader in compliance archiving and eDiscovery space, MessageSolution continues in our innovation, provides the most deployment options and expands our global growth with service provider partners and enterprise customers around the world."

MessageSolution's complete support of Microsoft Office 365 brought service provider partners more services to offer for corporate customers, allowing direct import of historical email data at mailbox-level from a customer's Office 365 environment. As the first provider of seamless integration with Office 365, MessageSolution technologies enable companies to directly import legacy email and file data already stored in MS Office 365, preserve the end users' Outlook and file folder structures, as well as archive the ongoing new data for regulated compliance and litigation requirements.

Integrated with market-leading cloud solutions provided Microsoft Azure, Amazon, IBM and others, MessageSolution Unified Information Archiving and eDiscovery Platform for Email, File and SharePoint supports Exchange Servers, Office 365, SharePoint Online, MS One-Drive, Google Mail, and IBM Domino.

MessageSolution's open archive policy equips security service providers and customers with a replacement for McAfee/MX Logic email archiving service, and the additional option of seamlessly deploying as a dedicated private cloud solution or an on-premise enterprise archiving and eDiscovery solution.

"We've seen significant uptick of document archiving inquiries in the time when GoBD Regulation became a 2017 new compliance archiving requirement in Germany and across Europe for corporate data from email and file servers," explains Kevin McNerney, MessageSolution Global Marketing Strategist, "MessageSolution Unified Email and File Archive for both enterprises and service providers has gained traction in Q1 this year, in addition to our Enterprise SharePoint Archive for both corporate SharePoint servers and SharePoint Online in Office365."

MessageSolution will be showcasing its service provider hosted platforms for enterprise information archiving and eDiscovery in HostingCon at the Los Angeles Convention Center in California, from April 3rd to 6th at Booth #534.
