

MessageSolution Showcases Its Gold Certified APS Package in MessageSolution Cloud Information Archiving and eDiscovery Solutions at Parallels Summit 2013

With the gold certified APS Package to enable Parallel's online provisioning and billing system, small and medium enterprises now have seamless access to MessageSolutions' cloud archiving and eDiscovery solutions, which will aid them in litigation support, complying with governmental regulation, and reducing storage on their email servers.

Las Vegas, Nevada and Milpitas, CA, February 4, 2013- MessageSolution, a global leader in enterprise email, file and SharePoint systems releases its gold certified APS package at Parallels Summit 2013 in Las Vegas, February 4-6, 2013. The APS package enables Parallels Automation for MSP partners and SME clients to quickly implement MessageSolution Cloud Compliance Archiving and eDiscovery Services, providing a zero-touch approach for a wide range of SaaS/IaaS cloud offerings, including MessageSolution Cloud Archiving and eDiscovery services which are currently available within the Parallels APS ecosystem. According to Parallels, "the Gold level is suited for service providers that intend to deliver the highest quality SaaS [cloud] support."

Parallels gold certification allows clients and partners to operate provisioning, billing, and desktop virtualization on a single platform. With invoicing, ordering control panels, pre-installation, software deployment and many other essential functions are unified into one complete Parallels Automation Platform. MSPs and other hosting companies can now supply SME customers with MessageSolution cloud and multi-tenant archiving and eDiscovery services quickly and seamlessly providing customers with regulatory compliance, eDiscovery and storage management abilities, and making it possible for SMEs to purchase a subscription from their service provider via the Parallels self-service portal and manage their MessageSolution Information Archive and eDiscovery service conveniently.

MessageSolution strives to deliver solutions that integrate seamlessly with Parallels to support global MSP partners in their efforts to provide cloud archiving systems to international clients. Their APS is supported by the Parallels Automation System and quickly and easily allows SME access to information archiving technology.

The MessageSolution MSP multi-tenant platform empowers service providers and MSP to instantly implement MessageSolution cloud archiving and eDiscovery services through Parallel's APS packaging to offer a standardized, automated billing service along side cloud archiving. In addition to integrating with companies' SharePoint and file systems for archiving and discovery, MessageSolution Cloud Archiving and eDiscovery Platform is compatible with all major email servers including: Microsoft Exchange, IBM Lotus Notes Domino, Novell GroupWise, Cisco WebEX Mail, Google Mail, in addition to Unix-based servers such as Scalix, Zimbra, PostFix, Kerio, Qmail, Imail, Sun Server and several others.

"In addition, MessageSolution's servers have the highest scalability in the market, archiving over 25,000 users on a single server. Other Tier 1 competitors require four or more," maintained Kevin McInerney,

Global Marketing Strategist. “This effectively controls hardware costs and exponential data growth when archiving and storing millions of users in the cloud, and lowers the average prices for end users.”

MessageSolution’s Multi-Tenant Archiving and eDiscovery Platform, which was first to market, is an inclusive industry-favored software solution that can be deployed into hosting partners' datacenters anywhere on the globe. Thanks to remote installation, partners’ business services, profitability, and client retention are maximized. As a result of deploying the MessageSolution platform, partners are free to fully employ their expertise to provide quality service for their clients.

Parallels, founded in 1999, aims to simplify the way businesses perform vital functions. They are the global front-runner in hosted and cloud services and desktop virtualization, providing access to over 9,000 service providers in more than 125 countries. Desktop virtualization software streamlines and automates computing applications that small and medium sized businesses use on a regular basis.

MessageSolution will be exhibiting their gold-certified solutions at Parallels Automation 2013 at Caesar’s Palace from February 4-6 in Las Vegas, Nevada.

About MessageSolution, Inc.

MessageSolution, Inc., is an industry leader in email, SharePoint & file systems content archiving, eDiscovery legal support and migration. With Cloud, Multi-Tenant and On-Premise solutions available, MessageSolution enables organizations of all sizes in all industries to mitigate risk, reduce storage costs and requirements, optimize server performance, and comply with industry and federal regulations. MessageSolution Enterprise Archiving and eDiscovery Platform supplies the organizational and governing backbone with the ability to manage the lifecycle of electronically stored data (ESI) by fully integrating with Lotus Notes Domino, Exchange, GroupWise and all Linux email platforms. It automatically archives all email, email attachments, files and all SharePoint/Quickr content types and permissions to the instantly accessible archiving server to optimize email server performance. These integrations also make federated searches of all repositories and data stored in all global locations available from one user-friendly interface.

Based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Mainland China, along with distribution channels in Europe, Asia Pacific, Africa, Australia & the Middle East.
