

MessageSolution Showcasing Enterprise SharePoint Governance Solutions at SharePoint Technology Conference 2012

MessageSolution, an industry leader in Enterprise Informational Archiving, eDiscovery & Data Migration exhibits award-winning archiving and eDiscovery Solutions for SharePoint at Microsoft SharePoint Technology Conference 2012 in San Francisco

San Francisco, California (February 28, 2012) – **MessageSolution, Inc.**, a global leader in Enterprise Information Archiving and eDiscovery, brings all the functionality of its Enterprise eDiscovery Platform to the SharePoint environment. By integrating award-winning enterprise archiving policy with SharePoint's record center functions, MessageSolution has created a framework to automate eDiscovery and manage risk in SharePoint distributed farms. Now SharePoint administrators can regulate compliance, remotely offload Blobs to optimize SharePoint storage space and server performance, as well as search and restore objects instantly without the need for additional IT assistance.

"Legal discovery mandates that all SharePoint objects are available at any time. For this reason, there is a unique challenge for both the administrator and the litigators in the SharePoint environment," says Kevin McInerney, Global Strategist at MessageSolution, Inc.

"MessageSolution Enterprise SharePoint Management Solutions streamline and automate eDiscovery and litigation support." By providing file-level de-duplication and a unified index, MessageSolution can search and retrieve for objects in SharePoint environment ranging from midsized to enterprise multi-farm settings at once. Other eDiscovery features include retention management, legal hold, hold notifications (extending to file shares and Microsoft Exchange Servers, Lync and OCS Servers, etc.), unified user interface and Federated Search through all repositories across a distributed clustered server network in various countries to expedite and simplify discovery process and litigation support.

MessageSolution Enterprise SharePoint Governance Solutions are configured to treat each SharePoint server as an individual tenant. It optimizes organizations' SharePoint environment by offloading Blobs from the SharePoint server to increase speed and performance by utilizing Microsoft approved EBS and RBS protocols. Instantly search and restore pertinent data for legal discovery proceedings and leverage MessageSolution's high compression rate, Single Instance Storage (SIS) & de-duplication practices to drastically save storage space and upfront hardware costs. MessageSolution also holds the industry record in scalability, making it an ideal solution for either mid or large-scale enterprises.

MessageSolution will be showcasing its SharePoint Management Solutions and its Enterprise eDiscovery Platform at **2012 SharePoint Technology Conference** February 28-29 at the Union Square Hilton in San Francisco, CA . Booth # 808.

The MessageSolution Difference

Customers continually emphasize MessageSolution products' excellent overall performance, support of all major email servers, and ease of use. MessageSolution provides sub-second data retrieval, an intuitive interface with federated search capabilities, and ease of deployment and maintenance. MessageSolution's intelligent back-end design significantly reduces installation requirements, backup time, and the need for technical support.

MessageSolution Enterprise Email Archive™ deftly manages petabytes of data daily, a powerful enterprise archiving solution. Legal eDiscovery and litigation support are empowered by the archive's built-in search engine, which searches through millions of emails within seconds across global locations and data centers. Users can access their archive through their email client, browser, or BlackBerry.

MessageSolution delivers the industry's highest enterprise-level scalability and holds the industry record of archiving 25,000 users on one single MessageSolution archive server and with minimum hardware server configuration to archive for over hundred of thousands of users. Competitive vendors archive on average 3,000-5,000 users on a single archive server, much less than MessageSolution archiving system's scalability and flexibility. A high in-process compression rate combined with single instance message and attachment archiving slows archive storage growth.

Enterprise Email Archive™ further reduces organizations' storage costs by using only 25-30% of the original mail server storage space for live content archiving. MessageSolution's products support all Latin-based languages, as well as all character-based languages, such as Japanese and Chinese.

About MessageSolution, Inc.

MessageSolution, Inc., an industry leader in email, file and SharePoint archiving, eDiscovery and bi-directional migration, has spent years developing working solutions to real-world, industry concerns. With Cloud, Multi-Tenant and On-Premise solutions available, MessageSolution enables organizations of all sizes from all walks of life to mitigate risk, reduce storage costs and requirements, optimize server performance, and comply with industry and federal regulations. MessageSolution Enterprise Archiving and eDiscovery Platform supplies the organizational and governing backbone to manage the lifecycle of electronic stored data (ESI) by fully integrating with all aspects of the Lotus Notes, Exchange, GroupWise and more. It automatically archives all email, email attachments, files and all SharePoint/Quickr content types and permissions to the instantly-accessible, archiving server to optimize the Email server capabilities. These integrations also make federated searches available from one user-friendly interface.

Based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Mainland China, along with distribution channels in Europe, Africa, Australia, Asia Pacific & the Middle East.
