MessageSolution Enterprise Email Archive

Empowering the Messaging Systems

MessageSolution Enterprise Email Archiving (EEA) offers a secure, easy-to-use, cost-effective, and high-performance email archiving system. Corporations and institutions today recognize the need for electronic document supervision, archiving and retrieval capabilities that comply with industry regulations, as well as for cost-effective ways to restore and retrieve historical data to meet legal discovery demands.

By moving emails onto the MessageSolution Enterprise Email Archiving system, companies can dramatically reduce the cost and complexity of the primary email storage and email application infrastructure they require while ensuring regulatory compliance (such as with the Sarbanes-Oxley Act) and easy immediate access to the data. With less data on the email servers, the corporate messaging systems become easier to manage.

EEA helps you reduce your business and IT risks surrounding:

- Compliance & Discovery
- Storage Optimization
- Information Retention
- Disaster Recovery
- Knowledge Exploitation
- Operational Efficiency

Features & Benefits

Comply with Sarbanes-Oxley, SEC and other regulations

Significantly reduce storage requirements for email by up to 80%

Allow end-users to search all their past emails in all fields including attachments

*Increase email server performance and ease backup and restoration*

Eliminate desktop archive files (PST, NSF, and GroupWise local archive files)

*Support Linux platforms, deliver the most secure system and lowest TCO*

Increase employee and administrator productivity

The MessageSolution archiving system offers:

- Support Exchange Server, Lotus Notes Domino, GroupWise Server; and compatible with all major email servers.
- Compliance with industry regulations and legal requirements governing document retention and access, including SEC Rule 17a-4
- Reduction of the software and storage cost for your primary email server by reducing the needs for more email server software and expensive storage hardware, supports single instance archive
- Ability to search the archived messages and mine those valuable historical data
- Increased email server performance, scalability and reliability
- Easy, fast and secure access to archived email content
- Eliminate PST files – no need for users to manage their mail in PST files on local hard disks. PST files tend to grow very large and are difficult to backup and search. EEA system also helps users migrate their existing PST files

Email Client Access

By deploying MessageSolution's Enterprise Email Archiving, companies can enjoy the following distinctive benefits:

- **Unprecedented storage savings** through file compression, offloading messages to less expensive secondary storage devices, and elimination of spam and virus emails.

- **Reliable disaster recovery approach.** With EEA storing every important message for your business, the data is always ready to be accessed and restored in case of failure on your primary email server.

- **Increased employee and administrator productivity.** With mailbox quotas no longer required and each user capable of searching their own archive, the time consuming task of managing one's inbox is eliminated, allowing your staff to focus on the business at hand.

- **Enabled industry regulation compliance.** With an agnostic approach to storage media, EEA offers full support for all popular compliant media platforms. In addition to archiving the contents of the files and messages, EEA captures, indexes and archives all compliance-related metadata.

- **Highest archival performance available:** EEA is specifically designed for optimal throughput. Benchmark tests have garnered second to none processing speeds.

System Requirements:
Pentium III 800MHZ above
1GB RAM
40GB hard disk (a separate disk array for storage)
Internet Explorer 6, Firefox 1.x
1 Network Interface card
The machine can access to DNS service
The machine can connect to the Email Server
Linux 2.6, Windows 2000 or 2003 Server, Solaris

About MessageSolution Inc.

MessageSolution delivers the technology and infrastructure for total compliance. As the leader in compliance technology and data storage management, MessageSolution focuses on applying specialized expertise and advanced technology to help clients meet their critical needs.
