

# MessageSolution Enterprise File Archive

## The Complete File Archiving Solution

The price and complexity of managing historical files are growing almost as quickly as most enterprises' storage volumes. MessageSolution Enterprise File Archive provides a secure, easy-to-use, cost-effective, and high-performance storage management solution in its file archiving system. Enterprise File Archive dramatically reduces the cost and eliminates the complications of data storage, recovery and archiving for compliance, electronic discovery, and storage volume management.

As the leading innovator in compliance, storage, and search technology, MessageSolution's newest archiving system, Enterprise File Archive, gives organizations effortless control over their historical files by delivering a comprehensive file management system that allows users to easily search through massive quantities of files and immediately access data.

### Reduce Your Business & IT Risks Surrounding:

- Compliance & E-Discovery
- Storage Optimization
- Information Retention
- Disaster Recovery
- Knowledge Exploitation
- Operational Efficiency

### MessageSolution Enterprise File Archive Provides:

- Easy, fast and secure access to archived content via web browser and Windows desktop search
- Hierarchical storage optimization
- Single instance storage integrated with all servers & clustering
- Full text keyword/phrase and proximity searching, with sub-second search results
- High-powered file compression and deduplication
- User-friendly web-based administrative interface
- Compatibility with multiple operating systems, including Windows, Linux & Solaris platforms
- Remote installation and troubleshooting

### Benefits:

#### Reduce Storage Requirements By 75%

The archiving process compresses and offloads data to less expensive secondary storage devices, increasing primary server performance, scalability and reliability.

#### Secure Storage

Control users' archive access and use. Enterprise File Archive keeps original file security attributes and guarantees a secured storage archive.

#### Immediately Access Records

Faster, more accurate searching enables organizations to easily locate and restore data to meet compliance and electronic discovery deadlines without the price tag of traditional discovery methods.

#### Ease of Archive Maintenance

An intelligent back-end structure facilitates easy backup/restore and requires less maintenance, lowering long-term cost of ownership.

#### Increase Productivity

The fully automated process eliminates the time consuming task of manually managing corporate intelligence, allowing staff to focus on the business at hand.

#### System Requirements:

Pentium IV 2.0GHz (Minimum)  
Processor equivalent to your file server (recommended)  
2 - 4GB RAM  
40GB hard disk (additional disk space or disk array, NAS, SAN for storage)  
Internet Explorer 6, Firefox 1.x  
1 Network Interface card  
The machine can access DNS service  
Linux 2.6, Windows 2000 or 2003, 2008, Solaris

## How Enterprise File Archive Works

In addition to archiving the contents of candidate files, Enterprise File Archive transparently captures, indexes and archives all compliance-related metadata without impacting end-users. The archive supports over 400 file formats and identifies candidate files according to each organization's specifications, then compresses, deduplicates, indexes and stores the files. Archived files are available for immediate retrieval in case of emergency situations, compliance audits or e-discovery requests.

A clean, organized back-end and an intuitive interface design make Enterprise File Archive easy to use and quick to deploy, with no need for on-site installation, complicated maintenance or archive use classes. Implementing Enterprise File Archive reduces business risk and corporate liability while protecting organizations' investments in crucial elements of their IT infrastructures.

## MessageSolution Works for You

Our file archiving solution helps businesses organize, store, and search their corporate intelligence quickly and securely, even across multiple geographic locations. All MessageSolution products support Unicode, for searching in any language, including Latin-based and character-based foreign languages.

Enterprise File Archive is compatible with multiple operating systems and offers full support for all popular compliant storage media platforms, from direct attached disks to EMC Centera. No matter your current or future platform, Enterprise File Archive's flexible architecture fits into your current network file infrastructure and is able to adapt throughout the information lifecycle.

## Giving Customers Control and Support

The policy-based archive allows administrators to easily set up retention parameters and user access rights to meet each organization's unique archiving objectives. Staff can search for and immediately retrieve and restore their files without IT assistance, using a Windows desktop search or our easily navigable web-based interface.

In case of unexpected problems, MessageSolution offers our customers technical support 24 hours a day, 7 days a week, via email or telephone.
