

MessageSolution Enterprise Archive vs. Exchange 2010 Personal Archive

MessageSolution Enterprise Archive for Email, SharePoint, File Server, Lync 2010	Exchange 2010 Personal Archive Email Archiving (or Microsoft Hosted Office 365)
Compliance & eDiscovery	
A Compliance Solution Tamper Proof, Highest Document Authenticity	Not a Compliance Solution Does not ensure the archived data is not deleted
eDiscovery Suite of Functions Available Case Management, Redaction, Legal Review, etc Customer Access to Journal with Chain of Custody Verification	Limited eDiscovery Features Limited or no eDiscovery Functions & Features No Customer Access to Journal, no Chain of Custody Verification
Multi-Language & File Capabilities	
Unicode Solution Support to Search the contents in All Languages	Multi-language is Not Indexed & Not Searchable Not able to search through multi-language emails
Search All Attachment Files Also able to Search for over 400 file formats	Limited Search of File Format Not able to search PDF files & common format
Automated PST File Management Auto search through the network and archive PST	Manual PST management Command line practice, not regular user can do
Client Usability	
Offline Archiving & Data Accessible User can work on archived data when off internet	No Offline Archiving When user off internet, can't view archived data
Ease of Use for End Users No training required, transparent experiences	User Training Required As the separate set of folders causing confusion
Supports all Outlook and OWA Versions Flexible & no need to upgrade client's current version	Outlook & OWA 2010 and Limited Version only Force upgrade license & administration workload
Search & Discovery Capabilities	
Search All Common Attachment Files Also Search for over 400 file formats available	Limited Search of File Format Not able to search PDF files & common format
Files in Public Folders Centralize & archive these files and searchable	Public Folder Files are not Searchable When using the native Exchange Search function
Storage Reduction Capability Reduce Exchange Storage Data Volume 80% Exchange Server & Email Box Management	Archiving to Accumulate Exchange Data Volume Will face storage issue when volume grows large
Enterprise Information Archive	
Enterprise Information Archiving (EIA) Capabilities Archiving email, SharePoint, File Servers, Lync & OCS all-in-1	Email Archiving Only
Cost-Effective Licensing	
MessageSolution Enterprise Email Archive All versions available to archive for all users	Exchange 2010 Client Access License (CAL) High Cost; Standard CAL has no user archiving
