MessageSolution Enterprise Archiving for email, files systems, SharePoint, & Quickr files, eDiscovery, and email platform migrations

MessageSolution Unveils MessageSolution Enterprise Archive 6.0 On-Premise & SaaS Editions

The newly released features in MessageSolution Enterprise Archive 6.0 will be available in multiple editions, including an on-premise (in-house) software edition, a Software as a Service (SaaS) edition for direct customers, and an OEM Multi-Tenancy SaaS edition for Exchange and all email server hosting, backup solution providers, IT consultants, system integrators, Cloud providers, and their datacenters.

MessageSolution software works seamlessly with Microsoft Exchange Server, file servers, and Microsoft SharePoint Server to provide a powerful turn-key enterprise archiving & eDiscovery solution. MessageSolution Enterprise Archive & eDiscovery Suite is an award-winning archiving software suite designed to support Exchange Server (Enterprise, Hosted version, or BPOS), IBM Lotus Domino Server, Novell GroupWise Server, and a variety of Linux and UNIX-based email servers.

With MessageSolution Enterprise Archive 6.0 Multi-Tenancy SaaS Datacenter edition, MessageSolution provides OEM and UI-rebranding services for managed service provider (MSP) partners that host Exchange, Domino, GroupWise, Linux email servers and online backup solutions, to help partners to build their own SaaS archiving & eDiscovery services offer to their clients, with brand loyalty.

MessageSolution Enterprise Archive 6.0 provides more advanced legal discovery features, such as the ability to conduct scheduled search for credit card and social security numbers for PCI compliance, then conduct data redaction. Other features include complete email tracing and automated continuous data mining for sensitive information. Archiving status reports can also be emailed to the archive administrator on a daily basis for improved supervision. eDiscovery features including case management, classification, redaction, legal review and legal team collaboration, etc.

“MessageSolution Enterprise Archive 6.0 provides a variety of new features and functionalities while building on the success of Enterprise Email Archive 5.6.1, which gave users the ability to access corporate email, file, and SharePoint archives from one convenient interface”

*MessageSolution Chief Technology Officer
Jeff Liang.*

User-friendly features added to MessageSolution Enterprise Archive 6.0 include an intelligent “concept search” that recognizes near matches in keyword searches and a simplified search screen that yields more advanced options if a user prefers. Users can also view entire message threads and create large numbers of different Classifications, managed by a “tree structure”.

Version 6.0 provides more granular archiving policies, such as allowing the application of policies for specific inbox folders, user mailbox threshold-based policies, and more flexible scheduling of archiving processes. Advanced file archiving retention policies help corporate customers efficiently manage file servers. MessageSolution Enterprise Archive 6.0 also takes advantage of additional Microsoft features such as the Exchange 2007 Web Services (EWS) protocol, as the first enterprise archiving and eDiscovery solution that is integrated with EWS.

MessageSolution Releases Enterprise Migration System, the First Multi-Functional Migration/Archiving System in the Market, at IBM's Lotusphere

MessageSolution, Inc., the global technology leader in email, file, and SharePoint/Quickr archiving solutions for electronic discovery, litigation support, compliance, storage management, and email server migrations, today announces the release of MessageSolution Enterprise Migration System, the first enterprise level multi-functional, cross-server migration software system in the market to simultaneously deliver mail server migration, legacy email archiving, stubbing, and ongoing email archiving of new email from post-migrated mail servers, a high-performance all-in-one migration/archiving system.

Although the email server migration market has long recognized the need for cross-platform messaging migrations for archived email environments, no other company before MessageSolution has accomplished the ultimate goal of performing migration and archiving simultaneously, being able to migrate from Domino to Exchange, GroupWise to Exchange, or Exchange to Domino, Exchange to Scalix, etc. MessageSolution Enterprise Migration System will help companies that plan to switch email server environments to achieve a smooth yet timely transition. MessageSolution's integrated high performance migration/archiving system streamlines the customary multi-stage migration and archiving processes that ultimately cost more time and software licensing fees from multiple vendors.

"We're proud that MessageSolution is the first in the industry to integrate a multi-functional migration system,"
- MessageSolution CTO Jeff Liang

"MessageSolution Enterprise Migration System delivers high performance bi-directional mail server migration, archiving, stubbing when necessary, along with simultaneous archiving of new emails -- all of these tasks in one process."

- MessageSolution CTO Jeff Liang

"The idea is to have one product that addresses multiple requirements and resolves multiple issues that traditionally would need two or three products to do so," Liang explained. "

As the first software vendor in the market to deliver an on-site archiving solution, Enterprise Email Archive, that supports all three top-selling email servers - Exchange, Domino, GroupWise, along with all Linux-based mail servers -

MessageSolution's engineering development team leveraged its profound expertise and understanding of these mail server environments to revolutionize migration technology by delivering the first multi-functional migration/archiving system in the market.

Welcome a few of our new Customers & Partners!

PARTNER SECTION

As a member of the MessageSolution Partners Network, your organization is eligible to **receive 3-7% of the purchasing price** for any organization you refer to MessageSolution that purchases MessageSolution products or services.
