MessageSolution Introduces Archive Data Replication, the Disaster Recovery Solution for its Managed Service Provider Multi-Tenant Archiving & eDiscovery Platform at MSP World / Cloud Computing Expo 2012

MessageSolution, the global technology leader in enterprise information archiving and eDiscovery will be exhibiting its award-winning on-premise, Cloud & Multi-Tenant MSP-Hosted Archiving Solutions at MSPWorld 2012 in Miami Florida Booth # 1118 February 1-3, 2012.

Milpitas, CA and Miami, FL (February 1, 2012): MessageSolution, Inc. The global technology leader in enterprise email, SharePoint, and File archiving and eDiscovery will be exhibiting its archiving and eDiscovery platforms at the MSP World/ Internet Technology Expo 2012 at the Miami Beach Convention Center in Miami, Florida from February 1-3.

First in the market, MessageSolution Multi-Tenant Archiving & eDiscovery Platform is an industry-leading packaged software solution to be deployed into hosting partners' datacenters to maximize partners' service profitability and client retention, hence fully utilize partners' expertise in providing managed services. Currently the award-winning MessageSolution Archiving & eDiscovery technologies are being deployed by managed service providers around the world for hosting in datacenters, managed by the service providers including email hosting firms, online backup solution providers, Cloud storage service providers, IT consultants, ISPs and system integrators.

"Continuous data protection and the ability to have immediate access to important emails and files is not only a matter of convenience, but its proper organizational governance and often demanded by legal mandates and compliance regulations." Say Kevin McInerney, MessageSolution Global Marketing Strategist, "MessageSolution's archiving and eDiscovery solutions with the built-in Archive Data Replication, move the responsible service provider into perfect alignment with best practices in this regard. Now with the ADR Copy-on-Write technology for continuous data protection, our MSP partners can check the due diligence box for DR, and move on to other responsibilities and priorities of datacenter operations ".

As a Microsoft Gold Partner, MessageSolution's product development team has achieved the following:

• Fully support Outlook 2011 MAC Entourage (the first Outlook 2011 integration in the market)

• Fully support Exchange 2010 (First Exchange 2010 Web Service Protocol Integration in the market for both On-Premise and Cloud Archiving & eDiscovery implementations)

- Providing a complete advanced eDiscovery solution for Exchange 5.5, 2000, 2003, 2007 2010, SharePoint 2003 – 2010, and File Systems

- A complete integration with Outlook 2000, 2003, 2007 and 2010 (With "0" footprint on Exchange consuming "0" resource on Exchange Server)

- Fully support Windows Server 2008 64-bit Platform (The first in the market 64-bit enterprise-class archiving application)

MessageSolution Multi-Tenant Archiving Platform for Microsoft Hosted Exchange

Compatible with Microsoft Multi-Tenant Hosted Exchange, MessageSolution's multi-tenant Archiving Platform allows managed service providers (MSP) or educational school districts to deliver a centralized archiving system on a cost-effective single hardware configuration with multiple archives and administration roles for organizations with their own individual archives. Leveraging MessageSolution's top industry scalability records, MSP partners are able to archive tens of thousands users on a single server to minimize hardware cost and to efficiently leverage MSP's existing service-hosting capacity and datacenter infrastructure to provide SME and organizations around the world a cost-effective yet feature-rich archiving and eDiscovery solution. Multiple school districts have also successfully deployed MessageSolution Multi-Tenant Archiving Platform with a single archiving system to offer dozens of school districts with their own separated archives, hence each school district has its own archive to meet the compliance and eDiscovery requirements.

MessageSolution Enterprise Archive for Exchange, File System and SharePoint

As a Microsoft Gold Partner, MessageSolution delivered the first in the market Exchange 2010 Web Services integrated archiving platform at Microsoft WinConnections in November 2009. MessageSolution Enterprise Email Archive operates within an organization's network firewalls and connects to the Exchange server via WebDAV or CDO to capture and archive email based on the company preferred settings. Emails are captured, compressed and de-duplicated using single instance storage (SIS) prior to being archived. This process reduces the storage requirements of the archiving server by an average of 75%. The real-time mailbox management feature reduces Exchange information storage for over 90% by creating a transparent link in the user mailbox.

The Enterprise File System and SharePoint Archives are built in the same UI with the email archiving system and built onto the same hardware server configuration. This provides the system administrator with a conveniently centralized administration console to manage and operate all email, file document and SharePoint archiving/eDiscovery tasks. The end user is able

to conveniently review and search his/her own personal archive for email, file and SharePoint file with one UI.

Enterprise eDiscovery Platform for Email, File System, and SharePoint

MessageSolution eDiscovery Platform key features include: Case Management, Early Case Assessment, Culling, Legal Review, Litigation Hold, Collaboration and Data Redaction. The eDiscovery Platform is fully integrated with MessageSolution Enterprise Archive, which pinpoints, captures and retrieves email, files, SharePoint files on or offline for live court presentation or deposition process, and places Litigation Hold on all archived emails and file documents throughout entire organization. MessageSolution eDiscovery Suite streamlines data collection for email and file from Exchange, File servers and SharePoint environments for processing, analysis, cull-down, and review phases of eDiscovery for legal cases. Legal team uses the eDiscovery system's culling capabilities to prune large datasets to much smaller and more relevant ones.

Legal counsel and corporate compliance officer can also utilize the built-in Data Redaction function to fully prepare organizations for further document processing in a legal proceeding, to enable organizations to meet civil litigation process, HIPAA, PHI, PHI and PCI-DSS compliance requirements for custodians' privacy protection and to activate an automated leak-prevention protocol for corporate intelligence protection in an external audit process. First among all enterprise archiving providers in the market MessageSolution Enterprise eDiscovery Suite offers Data Redaction function, while other market archiving providers still need to partner with a special eDiscovery vendor to offer its data redaction solution, with a raised cost yet not able to provide a streamlined solution performance and technical support.

About MessageSolution, Inc.

MessageSolution, Inc., is an industry leader in email, SharePoint & file systems content archiving, eDiscovery legal support and migration. With Cloud, Multi-Tenant and On-Premise solutions available, MessageSolution enables organizations of all sizes in all industries to mitigate risk, reduce storage costs and requirements, optimize server performance, and comply with industry and federal regulations. MessageSolution Enterprise Archiving and eDiscovery Platform supplies the organizational and governing backbone to manage the lifecycle of electronic stored data (ESI) by fully integrating with Lotus Notes Domino, Exchange, GroupWise and all Linux email platforms. It automatically archives all email, email attachments, files and all SharePoint/Quickr content types and permissions to the instantly-accessible, archiving server to optimize the email server performance. These integrations also make federated searches of all repositories and data stored in all global locations available from one user-friendly interface.

Based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Mainland China, along with distribution channels in Europe, Africa, Australia, Asia Pacific & the Middle East.
