MessageSolution Releases Enterprise NSF Database Archive, Showcasing Enterprise eDiscovery Suite for Domino, Enterprise Information Archiving and Email Cross-Platform Migration System at Lotusphere 2011

Driven by innovation, MessageSolution delivers a full suite of award-winning enterprise information archiving solution for email, file systems, SharePoint, Quickr, OCS and SameTime. With its Enterprise NSF Database Archive and Enterprise eDiscovery Suite for Domino being released, MessageSolution leads the market with its enterprise archiving and eDiscovery technologies with both on-premise and Cloud-driven solutions.

Orlando Florida, and Silicon Valley, CA, February 1, 2010 -- MessageSolution, Inc., the global technology leader in providing award-winning enterprise email, file systems, and Quickr/SharePoint in-house and Software as a Service (SaaS) archiving for electronic discovery, litigation support, compliance, storage management and email cross-platform migrations, today released MessageSolution Enterprise NSF Database Archive and is showcasing its Enterprise eDiscovery Suite and Enterprise Email Cross-Platform Migration System at IBM Lotusphere 2011 Conference in Orlando, Florida.

MessageSolution Enterprise NSF Database Archive performs storage reduction for the organizations' Domino application environment.   It frees up the storage space for the Domino applications and NSF files to significantly improve these applications' performance and reduce administrator maintenance workload. The solution enables Domino application users to conduct search across databases   providing the best user experience and increases the organizations' overall productivity.

MessageSolution's newly released Enterprise eDiscovery Suite for Domino contains a full suite of litigation support functions such as Case Management, Early Case Assessment, Legal Review, Collaboration, and Data Redaction, in addition to email, file systems and Quickr/SharePoint archiving modules.

"With the new release of Enterprise NSF Database Archive system, MessageSolution makes a complete enterprise information archiving (EIA) solution offer to the enterprise customers. From enterprise customers with tens of thousands of users to SME clients, today's enterprise clients around the world are encountering increased demand for electronic data discovery for litigation support for various auditing mandates," said Kevin McInerney, Marketing Strategist at MessageSolution, Inc. "MessageSolution's newly available advanced Enterprise eDiscovery Suite for Domino effectively helps the organization of all sizes range from 50,000 enterprise clients to 5-user SME clients cost-effectively meet their eDiscovery requirements."

A leading innovator in enterprise information archiving and eDiscovery space, MessageSolution is the first enterprise live archiving and eDiscovery provider to deliver a turn-key multi-tenant solution that is deployed in managed service provider (MSP)

partners' datacenters around the world, offering compliance archiving and eDiscovery services to the organizations range from 2 email users up to organizations with 25,000 users managed by the MSP partners. As a technology provider supporting global MSP partners' software services, MessageSolution works closely with the IBM ISV engineering support team to offer a full suite of eDiscovery solutions to enterprise and SME customers, in addition to its NSF database and enterprise information archiving solutions. MessageSolution Enterprise eDiscovery Suite is also available for email servers and services such as Microsoft Exchange, Novell GroupWise, Cisco WebEX Mail, Google Mail, Zimbra, Postfix, Scalix, Kerio, Imail, Qmail, Sun Server and more.

MessageSolution Email Cross-Platform Migration System helps enterprises to quickly convert from Novell GroupWise servers or Lotus Notes Domino to a Microsoft in-house Exchange, online Office 365 (BPOS), or Google environment, with the option to establish a centralized eDiscovery and enterprise archiving system in parallel with the email cross-platform migration process being completed.

MessageSolution is to exhibit its leading edge new product developments at IBM Lotusphere 2011 in Orlando Florida, booth #705 from January 30 - February 3, 2011, at Novell BrainShare Expo 2011 in Salt Lake City, Utah, as well as at Microsoft TechEd Expo 2011 in Georgia, GA.

About MessageSolution, Inc.

MessageSolution is the global technology leader in providing award-winning email, file system, NSF Database and SharePoint/Quickr archiving for electronic discovery, compliance, content storage management, and email cross-platform migrations. With products and services delivered both on-premise and as Software as a Service (SaaS), MessageSolution enables organizations to mitigate risk, reduce costs and storage requirements, optimize server performance, and comply with industry and federal regulations. Based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Mainland China, along with distribution channels in Europe, Africa, Australia, and Asia Pacific.

MessageSolution Enterprise Email Archive, Enterprise File Archive, Enterprise SharePoint Archive, NSF Database Archive and Enterprise Migration System are on-premise solutions and Software as a Service (SaaS) archiving services implemented for organizations across all industries, including finance, health care, education, manufacturing, government agencies and non-profit organizations worldwide. MessageSolution software frees IT administrators from daily maintenance and increases overall employee productivity. For more information, visit http://www.MessageSolution.com.

MessageSolution is actively working with partners around the world to work with global clients of all sizes. Please visit our web site for more information on the Global Partner Network Program.

What Differentiates MessageSolution Products

On-premise and SaaS customers continually emphasize MessageSolution products' excellent overall performance, support of all major email servers, and ease of use combined with a rich feature set. MessageSolution provides sub-second data retrieval, an intuitive interface, and ease of deployment and maintenance. MessageSolution's intelligent back-end design significantly reduces installation requirements, backup time, and the need for technical support.

MessageSolution Email Cross-Platform Migration System for GroupWise and Domino to Exchange or Google, providing organizations with high-speed email platform conversion with accuracy, migrate

mailboxes, calendar, contact and addresses all major business information, with option to establish a corporate archiving and eDiscovery system simultaneously.

MessageSolution Enterprise Email Archive™ deftly manages petabytes of data daily, a powerful enterprise archiving solution. Electronic discovery and litigation support are empowered by the archive's built-in search engine, which searches through millions of emails within seconds across global locations and data centers. Users can access their archive through their email client, browser, or BlackBerry and IPHONE.

In the first quarter of 2009, MessageSolution became the first archiving vendor in the market to deliver a true 64-bit application that runs on a 64-bit OS machine, and subsequently delivered the first in the market Exchange 2010 Web Services integrated archiving and eDiscovery system.

MessageSolution delivers the industry's highest enterprise-level scalability and holds the industry record of archiving over 25,000 users on one single MessageSolution archive server, 5-8 times over competitions; and with clustered archiving system configuration to archive over hundreds of thousands of users in datacenter environment. Competitive vendors archive on average 3,000-5,000 users on a single archive server, much less than MessageSolution archiving system's scalability and flexibility. MessageSolution's in-process compression combined with Single Instance Storage (SIS) de-duplication of message, attachment and file archiving reduces archive storage requirements.

MessageSolution Enterprise Archive Suite™ further reduces organizations' storage costs by using only 25-30% of the original mail server storage space for live content archiving.

MessageSolution's products support all Latin-based languages, as well as all character-based languages, such as Japanese and Chinese.
