MessageSolution Releases Enterprise Email Archiving Suite Edition 4.5 at Lotusphere 2007 and Continues Its Innovative Leadership Position In Compliance Email Archiving, Information Retention, and Storage Management

MessageSolution, Inc., the pioneer in developing and providing email and instant message archiving, legal search, electronic discovery, and storage management for enterprises to achieve the regulatory compliance, continues its growth momentum in the worldwide market.

Orlando, FL, January 22, 2007 -- MessageSolution, Inc., the leading technology innovator in email archiving, information retention, storage management, email compliance and litigation support, today announced its release of Enterprise Email Archiving Suite Edition 4.5 for Domino (EEA) at Lotusphere 2007 in Orlando, Florida.

"We're proud to exhibit our EEA Suite 4.5 Lotus Notes Domino Edition at the Lotusphere 2007," said Jeff Liang, CTO of MessageSolution, Inc. "In Quarter 4 of 2006, we added dozens of product distributors worldwide to our proud list of distributors. Thanks to the hard work put in by our employees and partners, in recent years EEA has been chosen by the worldwide enterprise customers as a fast implementable compliance archiving solution with easy maintenance, superior archiving and searching functionalities. Unlike the archiving products in the market today, MessageSolution EEA requires no SQL database. It eases IT Administrators' workload and saves organizations resources for SQL database configuration and maintenance. With other solutions, the database maintenance has to be done in synch with the archiving software products."

Continuing its rapid growth in North American market, in the fourth Quarter last year alone MessageSolution has newly established dozens of partners and product distributors worldwide in the strategic regions such as Great China, Taiwan, Hong Kong, Europe, and South Africa, etc. MessageSolution, Inc. is actively working with partners worldwide to expand its business presence. Please contact bd@messagesolution.com for more information on the MessageSolution Partner Network Program.

In addition to support Exchange 5.5, 2000, 2003 and 2007, MessageSolution Enterprise Email Archiving Suite Edition is seamlessly integrated with Lotus Notes Domino, and all storage devices. It includes Domino DWA and Exchange OWA supports, Windows/Linux multi-platform operating systems compatibility, and the native Linux platform support. The recent EEA's benchmark testing in the messaging environment scales to 100,000 users for enterprises and 400,000 users for educational institutions and non-profit organizations; these results showed stable performance in capturing email messages from various email servers, and the fast search with email retrieval/restore from the archive.

About MessageSolution Enterprise Email Archiving Suite Edition 4.5:

By archiving email and attachments from the email server with MessageSolution Enterprise Email Archiving Suite, the industry-leading onsite email archiving software solution, the enterprise customers can significantly reduce the cost and complexity of the primary email storage and email application infrastructure while ensuring compliance and the immediate access to the email and attachment data from a preferred email client. For the IT Server Administrators, it means no more headache managing PST files for the Exchange nor NSF files needed for the Lotus Notes Domino. With less data on the email servers, the server performance is maintained at the optimized level and the corporate messaging systems become highly efficient to manage.

MessageSolution EEA product family includes two main editions: EEA Suite Edition and EEA Compliance Express Edition. The large size enterprises often select EEA Suite for its comprehensive feature-set, massive scalability, and the seamless integration with MSFT Outlook, Lotus Notes Domino, or its multi-platform compatibility with Windows and native Linux OS support. The medium size companies choose the EEA Express Edition for a sufficient and fast implementable compliance archiving solution with storage optimization functionalities, along with the excellent performance offering a robust, cost effective, and easy to maintain archiving solution with no database configuration and maintenance required.

Being the first email archiving system in the market with cross-platform compatibility of Windows and the native Linux OS support, MessageSolution Enterprise Email Archiving Suite continues to be one of the major archiving solutions being selected by the enterprise customers worldwide.

Main Modules and Features in MessageSolution Enterprise Email Archiving Suite Edition (EEA Suite):
