

## **MessageSolution Exhibits Exchange 2010 Web Services Integration First in the Market for Integrated Enterprise Information Archiving at Microsoft TechEd 2010**

New Orleans, LA, and Silicon Valley, CA, June 7, 2010 -- MessageSolution, Inc., the global technology leader in email, SharePoint and file systems integrated archiving that delivers on-premise and Software as a Service (SaaS) archiving for electronic discovery, litigation support, compliance, storage management, and email server migrations, today begins exhibiting the market's first enterprise class archiving and e-discovery solution with Exchange 2010 Web Services integration at Microsoft TechEd 2010 Expo in New Orleans.

As a leading innovator in the live archiving and e-discovery space, MessageSolution is the first on-premise and SaaS archiving provider in the market to fully integrate with Exchange 2010 Web Services (EWS). As the most robust, scalable and high performance industry standard platform, Exchange 2010 Web Services enables MessageSolution's scalability record-setting archiving solution to massively scale to collect all data and the full set of metadata, providing corporate legal counsel with a completely thorough e-discovery process. The Exchange 2010 EWS also allows MessageSolution to leverage its cross-platform capability to fully support managed services providers' (MSP) Linux OS requirement in their data centers.

"Customers in the field who have completed the upgrade to Exchange 2010 praised MessageSolution Enterprise Archive's Exchange 2010 Web Services integration for its ease of use, security, scalability and high performance," said Kevin MCinerney, Global Marketing Strategist at MessageSolution, Inc.

While other Microsoft Exchange server archiving vendors in the market are still largely MAPI-based, MessageSolution's Exchange 2010 Web Services integration enables the full collection of all data types while taking advantage of the additional scalability and robustness that EWS offers.

"When supporting enterprise customers' e-discovery and legal document processing today, maintaining the integrity of the original data is imperative," Mr. MCinerney explained. "Exchange 2010 Web Services is the industry standard platform for archiving and discovering email messages, attachment files, and instant messages that allows MessageSolution to build our on-premise and SaaS archiving solutions to capture all the necessary information each legal case requires."

MessageSolution's technology now is in over 30 countries and has entered rapid growth in the global market. As a Microsoft Gold Partner, MessageSolution will be present at Microsoft TechEd 2010 Expo from June 7 through June 11, in New Orleans, Louisiana.

#### **About MessageSolution, Inc.**

MessageSolution is the global technology leader in email, SharePoint, and file systems archiving for electronic discovery, compliance, content storage management, and email server migrations. With products and services delivered both on-premise and as Software as a Service (SaaS), MessageSolution enables organizations to mitigate risk, reduce costs and storage requirements, optimize server performance, and comply with industry and federal regulations. Based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Mainland China, along with distribution channels in Europe, Africa, Australia, and Asia Pacific.

MessageSolution Enterprise Email Archive, Enterprise File Archive, Enterprise SharePoint Archive, and Enterprise Migration System are on-premise solutions and Software as a Service (SaaS) archiving services implemented for organizations across all industries, including finance, health care, education, manufacturing, government agencies and non-profit organizations worldwide. MessageSolution software frees IT administrators from daily maintenance and increases overall employee productivity. For more information, visit <http://www.MessageSolution.com>.

MessageSolution is actively working with partners around the world to work with global clients of all sizes. Please visit our web site for more information on the Global Partner Network Program.

#### **What Differentiates MessageSolution Products**

On-premise and SaaS customers continually emphasize MessageSolution products' excellent overall performance, support of all major email servers, and ease of use combined with a rich feature set. MessageSolution provides sub-second data retrieval, an intuitive interface, and ease of deployment and maintenance. MessageSolution's intelligent back-end design significantly reduces installation requirements, backup time, and the need for technical support.

MessageSolution Enterprise Email Archive™ deftly manages petabytes of data daily, a powerful enterprise archiving solution. Electronic discovery and litigation support are empowered by the archive's built-in search engine, which searches through millions of emails within seconds across global locations and data centers. Users can access their archive through their email client, browser, or BlackBerry.

In the first quarter of 2009, MessageSolution became the first archiving vendor in the market to deliver a true 64-bit application that runs on a 64-bit OS machine.

MessageSolution delivers the industry's highest enterprise-class scalability and holds the industry record of archiving tens of thousands of users on one single MessageSolution archive server, 5-8 times over competitors. Competitive vendors archive on average 3,000-5,000 users on a single archive server, much less than MessageSolution archiving system's scalability and flexibility. A high in-process compression rate combined with Single Instance Storage (SIS) de-duplication of message, attachment and file archiving slows archive storage growth.

MessageSolution Enterprise Archive Suite™ further reduces organizations' storage costs by using only 25-30% of the original mail server storage space for live content archiving. MessageSolution's products support all Latin-based languages, as well as all character-based languages, such as Japanese and Chinese.
