

**MessageSolution Showcases MSecurity System<sup>™</sup> Integrated with Compliance Archiving eDiscovery Platform for Email Security & Ransomware Protection at 2019 RSA Conference**

*MessageSolution launches its new MSecurity System<sup>™</sup> to provide Ransomware protection and email content security. Leveraging its compliance email and file archiving advanced eDiscovery technologies, MSecurity System<sup>™</sup> delivers effective, proactive protection of corporate intellectual properties and privacy information for General Data Protection Rules (GDPR) and California Consumer Protection Act (CCPA) Compliance.*

San Francisco, CA (March 3, 2019) MessageSolution, an industry technology leader in compliance archiving and eDiscovery launches its newest product for ransomware protection and email security, MSecurity System<sup>™</sup>, at the 2019 RSA Conference in San Francisco.

"It takes a holistic approach for content security protection and information archiving. We have created a unified security framework that contains every day attacks at the gateway, and promotes security and privacy awareness with Outlook users," MessageSolution Global Marketing Strategist Kevin McNerney explained. "Outlook drag-n-drop to report those pesky phishing emails to MSecurity System<sup>™</sup> administrator as well as search and redact PII in email and files for GDPR and CCPA Compliance. MSecurity System<sup>™</sup> integrated with information archiving can reduce ransomware remediation costs by 200-300%."

Ranked as an "Emerging Player" for Enterprise Email Archiving by Info-Tech's Vendor Landscape, MessageSolution Enterprise Information Archiving eDiscovery Platform for Email, File Systems and SharePoint introduces privacy and threat protection for the companies with privacy-protection requirements, and for global customers to address the need to remediate Ransomware recovery times.

Archiving with MessageSolution Enterprise Archiving Platform integrated with MSecurity System<sup>™</sup> provides organizations with the most effective approach for encompassing threat protection and privacy protection with advanced eDiscovery classification. MSecurity System<sup>™</sup>'s Data Loss Prevention feature provides the benefit of oversight and privacy protection with anonymization services for faster review of subject requests on email, file and SharePoint contents. With MSecurity System<sup>™</sup>, MessageSolution enables global enterprise customers to "classify, report, and delete the privacy data upon request" to meet compliance requirements of GDPR and CCPA.

"The MessageSolution platforms are intuitive and administrator/user friendly. With industry-leading scalability, our global customers and partners regard MessageSolution technologies as the most cost effective, yet best-in-class solutions for both SMEs and international enterprises," McNerney stated.

MessageSolution will be showcasing MSecurity System<sup>™</sup> at the 2019 RSA Conference from March 3 - March 8 at North Hall Booth#4205 Moscone Center in San Francisco.
