MessageSolution Showcases Comprehensive Cloud & Enterprise Information Archiving & eDiscovery Platforms at Microsoft's WinConnections 2012

MessageSolution, the global technology leader in enterprise information archiving and eDiscovery, will be exhibiting award-winning cloud-driven and on-premise platforms for Microsoft Windows 2012 and Exchange 2013 at Microsoft's WinConnections 2012 in Las Vegas, Nevada.

Silicon Valley, CA and Las Vegas, NV

MessageSolution, a global technology leader in enterprise email, SharePoint and File System archiving and legal eDiscovery solutions, will be showcasing its award-winning technologies at Microsoft's WinConnections 2012 in Las Vegas, NV on October 29 to November 1, 2012.

MessageSolution is the only vendor in the market that delivers three award-winning information archiving and eDiscovery platforms: cloud archiving services for both enterprise and SME organizations, an on-premise enterprise solution and an MSP platform paving the way for Managed Service Provider partners to host information archiving and eDiscovery services for their own clients. MessageSolution delivers cloud-driven and on-premise archiving and eDiscovery solutions across different environments including email, SharePoint, and File Systems. Additionally, the MessageSolution information archiving and eDiscovery platforms empower clients with compliance, legal eDiscovery and advanced storage management features to ensure organization and efficiency from the enterprise level to an end-user perspective.

"As a Microsoft Gold Partner, MessageSolution has supported Windows Server 2012 and has also conducted a number of preliminary testing in anticipation for Microsoft's Exchange 2013 release. Our preparation ensures cloud service delivery and overall integration with Exchange 2013 and Windows 2012 support, which plays a vital role in the future of corporate data archiving and eDiscovery," says Kevin McInerney, marketing strategist.

"MessageSolution's architecture is designed for online global deployment with minimal IT/engineering support. We are proud to be Microsoft Cloud-Ready and our products are easy to deploy both on-premise and in the cloud. This has made MessageSolution's technology deploy at the fastest growth rate in the market today".

At WinConnections, MessageSolution will be showcasing its advanced cloud information archiving and comprehensive eDiscovery services for both enterprise and SME organizations. The MessageSolution cloud platform combines scalability and out-of-the-box technology to solve data management issues, ensure regulatory compliance and efficiently maintain email, SharePoint and File System server performance.

"MessageSolution has a distinctive ability to tailor solutions to fit each organization's unique archiving, storage and eDiscovery needs," McInerney states. MessageSolution will be exhibiting its award-winning enterprise information archiving and eDiscovery technologies along with Cloud archiving and eDiscovery solutions for all sized organizations on October 29 through November 1, 2012 in Bellagio, Las Vegas, NV.

In addition to supporting Windows Server 2012 and integrating with the anticipated launch of Exchange 2013, MessageSolution's product development team has achieved the following:

- Parallels Gold Partner Certification for Enterprise Email Archiving, allowing VAR and MSP partners to manage and quickly onboard clients for MessageSolution Cloud Services
- The first full integration with Outlook 2011 Mac in the market

For Immediate Release

- The first Web Service Protocol Integration with Exchange 2010 for MSP Hosted Platform, On-Premise and Cloud Archiving & eDiscovery implementations
- Providing a complete advanced eDiscovery platform for Exchange 5.5, 2000, 2003, 2007 2010, SharePoint 2007, 2010, File Systems on 64-bit OS Windows Server 2008 and 2012
- A complete client integration with Outlook 2000, 2003, 2007, 2010 and 2011 for email server data offloading storage management, with “0” footprint and consuming “0” resource on Exchange
- The industry’s highest enterprise-class scalability and holds the industry record of archiving 25,000 users on one single server or over 100,000 users in a clustered environment

MessageSolution will also showcase our advanced Enterprise SharePoint Archiving Platform at SharePoint Connections 2012. The MessageSolution SharePoint Archiving and Management Solution is built strictly on Microsoft EBS and RBS protocols. The Enterprise SharePoint and File System Archives are built in the same UI with the email archiving system and built onto the same hardware server configuration. This provides the system administrator with a conveniently centralized administration console to manage and operate all email, file document and SharePoint archiving and eDiscovery tasks. The end user is able to conveniently review and search his/her own personal archive for email, file and SharePoint content with one UI.

By integrating award-winning enterprise archiving workflow with SharePoint’s document management functions, MessageSolution has created a framework to automate eDiscovery and manage risk in SharePoint distributed farms. Now SharePoint administrators can regulate compliance, remotely offload Blobs to optimize SharePoint storage space and server performance, as well as search and restore objects instantly without the need for additional IT assistance.

About MessageSolution, Inc.

MessageSolution, Inc., an industry leader in email, SharePoint and file system archiving, eDiscovery and data cross-platform migration, supports its global clients and partners with cloud, MSP multi-tenant and on-premise enterprise solutions. MessageSolution enables organizations of all sizes to mitigate risk, reduce storage costs and requirements, optimize server performance, and comply with industry and federal regulations. MessageSolution Enterprise Archiving and eDiscovery Platform supplies the organizational and governing backbone to manage the lifecycle of electronic stored data (ESI) by fully integrating with all aspects of the Exchange, Domino, GroupWise and more. It automatically archives all email, email attachments, files and all SharePoint/Quickr content types and permissions to the instantly-accessible archiving server. These integrations also make global federated searches and legal discovery available from one user-friendly interface.

Based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Mainland China, along with distribution channels in Europe, Africa, Australia, Asia Pacific & the Middle East.
