MessageSolution – Makers of Enterprise Email Archive and Enterprise File Archive software solutions

MessageSolution Releases Enterprise Migration System, the First Multi-Functional Migration/Archiving System in the Market

MessageSolution unveiled the MessageSolution Enterprise Migration System at IBM's Lotusphere 2010, the first enterprise level multi-functional, cross-server migration software system in the market to simultaneously deliver mail server migration, legacy email archiving, stubbing, and ongoing email archiving of new email from post-migrated mail servers, a high-performance all-in-one migration archiving system.

Although the email server migration market has long recognized the need for cross-platform messaging migrations for archived email environments, no other company before MessageSolution has accomplished the ultimate goal of performing migration and archiving simultaneously, being able to migrate from Domino to Exchange, GroupWise to Exchange, or Exchange to Domino, Exchange to Scalix, etc.

"We're proud that MessageSolution is the first in the industry to integrate a multi-functional migration system," said MessageSolution Chief Technology Officer Jeff Liang. "MessageSolution Enterprise Migration System delivers high performance bi-directional mail server migration, archiving, stubbing when necessary, along with simultaneous archiving of new emails -- all of these tasks in one process."

MessageSolution Enterprise Migration System will help companies that plan to switch email server environments to achieve a smooth yet timely transition. MessageSolution's integrated high performance migration/archiving system streamlines the customary multi-stage migration and archiving processes that ultimately cost more time and software licensing fees from multiple vendors.

"The idea is to have one product that addresses multiple requirements and resolves multiple issues that traditionally would need two or three products to do so,"

"The idea is to have one product that addresses multiple requirements and resolves multiple issues that traditionally would need two or three products to do so," Liang explained. "Our engineers' profound knowledge of Domino, Exchange, GroupWise, and all Linux servers are fully reflected in this

- MessageSolution CTO Jeff Liang

sophisticated and high performance migration system, which is a great investment for today's businesses because it significantly reduces the costs and time that would be required with multiple vendors' products."

As the first software vendor in the market to deliver an on-site archiving solution, Enterprise Email Archive, that supports all three top-selling email servers - Exchange, Domino, GroupWise, along with all Linux-based mail servers - MessageSolution's engineering development team leveraged its profound expertise and understanding of these mail server environments to revolutionize migration technology by delivering the first multi-functional migration/archiving system in the market.

MessageSolution Awards Global Partners for Outstanding Global Support and Strategic Market Growth

This year's award winners were selected from among a collection of outstanding MessageSolution partners and account managers across the world, such as Technology Transfer & Training SA (3T) from Switzerland, iStorage from South Africa, Repton from the U.K., Digital China Ltd from China, Business Data Protection and Recovery Limited (BDPR) from Nigeria, Active Linux from the U.K., PineApp Ltd from Israel, and Pacific Professional Network from Hong Kong. MessageSolution's Global Partner Network has contributed to establishing MessageSolution's prestigious international customers, such as Zenith Bank, one of the largest banks in Nigeria, Bonhams in the U.K., the third largest auction house in the world, and Hong Kong University, one of the largest universities in Southeast Asia.

365 iTechnology in the United Kingdom was awarded MessageSolution's Most Engaged Partner of the Year Award for 2009, for which 365 iTechnology will receive allocated MessageSolution Marketing Development Funds for participating in archiving and storage-related tradeshow events sponsored by MessageSolution in the U.K. 365 iTechnology delivers enterprise class IT services and solutions that enhance operating effectiveness, raise productivity, and increase return on investment.

"Custom Technology is committed to providing Best of Breed, Open, Server Based Computing solutions, which makes MessageSolution's enterprise archiving solutions a top choice for our clients"

-Gordon Hubbard, Managing Director at Custom Technology Australia

Larry Pelling, an Account Executive at 365 iTechnology, was also selected as the winner of MessageSolution's Most Active Sales Executive of the Year Award for 2009.

MessageSolution awarded the Most Active Partner of the Year Award to Custom Technology Australia for acquiring multiple accounts in Australia and New Zealand, for which Custom Technology Australia will receive allocated MessageSolution Marketing Development Funds for participating in archiving and storage-related events sponsored by MessageSolution in Australia. Custom Technology has served channel partners and end users across Australia and New Zealand since 1989.

Ford & Associates from Cuyahoga Falls, Ohio, was awarded MessageSolution's Most Impressive Partner of the Year Award, and Capital Network Solutions from Sacramento, California was awarded MessageSolution's Most Promising Partner of the Year Award. Ford and Associates specializes in providing information system consulting services for government agencies, banks, doctors, lawyers, academic institutions and nonprofits. Capital Network Solutions is the Northern California premier network services and consulting company that offers IT services and benefits including maximizing computing efficiency, reducing datacenter space, lowering power and cooling requirements, and providing an effective disaster recovery plan at a cost lower than purchasing multiple individual machines.

"We are delighted to receive MessageSolution's Most Engaged Partner of the Year Award and it's great to see that our efforts are appreciated and recognized by MessageSolution. We look forward to working with MessageSolution at the appropriate archiving events and on a broad customer base in 2010."

-Garry Grows, director at 365 iTechnology.

Ralf Mueller, IT Manager at Ivaco International, Inc.

"...Messages indexed in less than 24 hours ! That is light speed. You guys are great."
Kayode Akomolafe at Infotech Software Group/Zenith Bank Plc/ Nigeria

NEW! MessageSolution Now Offers All-in-One, Integrated Cloud-Based Archiving for Email, File Systems and SharePoint release at Novell's BrainShare 2010

As a leading innovator in the live archiving space, MessageSolution is the first on-premise and SaaS archiving provider in the market to archive and stub for all top-ranked email server platforms, including Exchange, Domino, GroupWise, file systems and SharePoint, delivering compliance archiving for all Unix/Linux-based email servers, and file servers for NTFS/NFS/NSS/Netware. MessageSolution Enterprise Migration System helps organizations to migrate between email servers, such as GroupWise or Domino to Exchange bi-directional, and SharePoint or BPOS migration from multiple source systems. MessageSolution is first in the market to perform

*"SME and enterprise customers prefer our SaaS archiving services because we offer additional features and functions that are only being offered in on-premise solutions, which other SaaS hosted vendors do not have."
- MessageSolution CTO Jeff Liang*

simultaneous mail server migration, archiving and stubbing all in one streamlined process, to meet clients' requirements of email server migration and archiving for compliance, server storage management, e-discovery and litigation support.

MessageSolution's global cloud-based archiving allows international clients with multiple locations in different countries to take advantage of MessageSolution's SaaS Global Network's international archive locations to archive in nearby archiving systems managed by MessageSolution or its international SaaS Partners around the world.

Leading analyst Gartner reported in February of 2010 that the archiving market has evolved to include a broader focus on enterprise information archiving (EIA) and that today's products are predominately focused on the subset of EIA comprised of unstructured user files, email, files and SharePoint.

MessageSolution SaaS multi-tenancy archiving solution also appeals to OEM SaaS Partners around the world because of MessageSolution's design philosophy of architecting for scale and its patent-pending storage and database technology leveraging low-cost storage grids to maintain the

Field-proven in markets filled with low-grade computers and storage bricks, such as Africa and Asia, and through cost-effective global implementations performed online, MessageSolution's design philosophy allows MessageSolution cloud-based archiving systems to consume minimum hardware and storage resources for large-scale millions of user bases and long-term archiving operations at a fraction of the cost required to run competitors' SaaS or hosted services. This allows MessageSolution to offer the lowest cost SaaS multi-tenancy solution to be deployed in global partners' data centers to maximize partners' service profitability at the lowest cost-growth ratio, thereby fully utilizing partners' expertise in providing fully managed archiving services designed for organizations of all sizes.

MessageSolution's On Premise, SaaS and Hybrid Archiving supports all major email servers, including :

- ◆ Microsoft Exchange Server
- ◆ Novell GroupWise Server
- ◆ IBM Lotus Domino Server
- ◆ Scalix
- ◆ Kerio
- ◆ Postfix
- ◆ Postpath
- ◆ Zimbra
- ◆ Imail,
- ◆ Qmail
- ◆ Sendmail
- ◆ MDAemon
- ◆ Sun server, etc
