Q3 2012

MessageSolution — Global Technology Leader in Enterprise Information Archiving and eDiscovery

As **Q3 2012** comes to a close, MessageSolution reflects on the past quarter and the customers' implementations in our cloud services for information archiving and eDiscovery. MessageSolution secure cloud archiving offers clients the accessibility, control and security of information archiving without the data storage and server management requirements in addition to the enterprise on-premise deployments.

Cloud archiving in general has very low upfront costs as there are no hardware requirements. Cloud computing can also offer virtually unlimited storage, an advantage over the on-premise storage space and hardware required. With MessageSolution cloud services, no IT personnel are needed to manage the archiving server or to help end-users retrieve data, offering a hands-off solution.

### Advanced Features & Functions Include:

- Historical email and file data ingestion, online or offline
