

MessageSolution Enterprise Email Archive

Cloud, On-Premise, MSP-Hosted Archiving & eDiscovery Solutions

MessageSolution Enterprise Email Archive (EEA) is a one-stop solution for compliance archiving, eDiscovery, and storage management. It provides a secure, highly interactive data store and high-performance eDiscovery workflow for corporate email systems. EEA drastically reduces the cost and eliminates complications associated with data storage, recovery and information archiving. MessageSolution technologies also give users controlled retention options and self-serving hierarchical discovery accesses to archived data.

Advanced eDiscovery, Litigation Support

MessageSolution performs Fuzzy, Wildcard and Proximity searches for comprehensive data collection. In addition, it offers user-friendly eDiscovery features such as universal legal hold, configurable third-party Legal/Auditor discovery access, data redaction for privacy protection (a feature not commonly provided in standard email archiving systems).

MessageSolution also offers an advanced eDiscovery platform designed to direct eDiscovery requests from IT to the legal team. The legal team user-friendly features include Multiple Case Management, Case-Specific Access Authorization, Review Delegation, Legal Annotation, Legal Hold Notification, etc.

MessageSolution Compliance Archiving

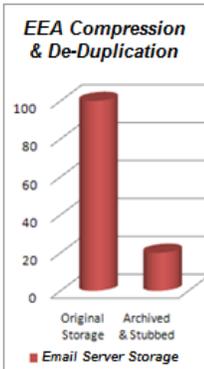

Implement MessageSolution EEA for real-time compliance archiving to achieve and maintain regulatory compliance by configuring granular data retention, automated data redaction and archive access policies for HIPAA, FoIA, SOX, FRCP, GDPR, etc. with random sampling for compliance auditing.

MessageSolution also maintains unalterable search and data access logs to preserve chain-of-custody and enforce privacy.

Hierarchical Storage Management

For organizations with storage cost concern, MessageSolution EEA efficiently offloads the data from expensive email server storage to inexpensive hierarchical archiving storage. It is a transparent process and there is no user-pattern change on the end-user client side, yet large portions of storage space are reduced both on the email and the archiving servers.

MessageSolution also leverages In-Process Compression and Single-Instance-Storage to reduce storage requirements by up to 75% for the archiving server. After compression, archived data is stored in a secured format with various encryption options.

MessageSolution Architecture & Solution Flexibility

MessageSolution Platform does not require any additional database or software licensing. The solution is the most scalable solution on the market and can archive for 25,000+ users on one server or for several hundred thousand in a clustered multi-server environment. This makes it ideal for both enterprise and the cloud hosting for SME organizations. MessageSolution also supports all popular email platforms.

Benefits

- On-Premise, Cloud and MSP-Hosted Solutions Available
- Unified Archiving for Emails, OneDrive Files & SharePoint Online
- Auto Policy-Based or User-Determined Retention Options
- Built-In Comprehensive eDiscovery Feature-set
- Configurable 3rd-Party Legal/Auditor Discovery Access
- Archives All Email Content - Messages, Attachments, Contacts, Calendar Items & Metadata
- Reduces Archiving Storage Requirements by up to 75%
- Granularly Controlled Archive Access
- Eliminate Local PST/NSF/GroupWise Files
- Save up to 90% of Email Server Storage
- Reusable Software Licensing
- Self-Serve Data Access - Download, Restore to Email Server, Send to Email Recipient, or Print Archived Data

System Minimum Requirements:

Pentium IV 2.0GHz (Processor equivalent to the email server recommended)
2 - 4GB RAM
40GB hard disk (additional space or disk array, NAS, SAN for storage)
Internet Explorer, Chrome, Firefox
1 Network Interface card
DNS service access
Linux 2.6, Windows 2000+, Solaris

Enterprise-Class Email Archiving, eDiscovery & Migration

MessageSolution Advantages

- **No 3rd Party DB Software Requirements**
- **Cloud, Hybrid, On-Premise, & Service Provider- Hosted Solutions**
- **Intelligent eDiscovery & Case Management Features**
- **Direct Email Client Integration**
- **Global, On-line Deployment & Support**
- **IOS App**
- **Industry-Leading Scalability**
Ideal for both Enterprises and SMEs, Will scale with corporate growth
- **Unified Solution**
For Email, SharePoint & File Systems Archiving
- **Unique Architecture**
specifically designed for enterprise high-volume unstructured data
- **Solution Flexibility**
Supports all major enterprise email platforms & hosted platforms including Office 365 & Google Apps

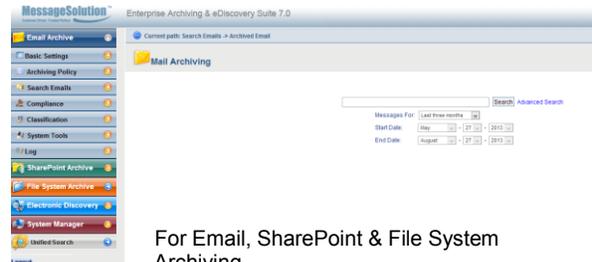

Supported Email Platforms

- Microsoft Exchange
- IBM Lotus Notes Domino
- Novell GroupWise
- Linux/UNIX-Based Servers
(PostFix, ProxPath, SendMail, IMail, Scalix, Zimbra, Qmail, Kerio, Sun Server, etc.)
- Hosted Email Platforms: Office 365, Google Apps, etc.

How MessageSolution Enterprise Email Archive (EEA) Works

MessageSolution EEA collects, replicates, compresses and indexes all data for advanced searching, eDiscovery and compliance management. Archived data through real-time archiving protocol provides information immediacy available for retrieval in business-critical situations such as compliance audits and eDiscovery requests.

In addition to archiving all contents of emails, MessageSolution transparently captures, indexes and archives all compliance-related metadata, messages, attachments, contacts and calendar items without impacting end-users.

For Email, SharePoint & File System Archiving
MessageSolution Enterprise Email Archive 7.0
Web Console Admin UI – Search Interface

With configurable and highly granular access controls, users can retrieve their own data or for designated users to discover data in custodians' accounts without IT involvement. After locating the necessary email data, it can be restored to the email server, emailed, downloaded or printed.

MessageSolution Enterprise Email Archive supports most corporate email environments

including Microsoft Exchange 5.5-2013-2016 and Office 365, IBM Lotus Domino 6.5-8.5, 9.0.1 GroupWise 7.0-2012, Google Apps and various Linux/UNIX-based email servers.

Cross-Platform, Legacy Server & Data Import Email Migrations

In addition to supporting archiving for all major email platforms, MessageSolution also offers Cross-Platform Email Migration (I.E. Domino to Exchange), migration from legacy email servers (Exchange 2003 to Exchange 2016), file in public folders to SharePoint, etc. all directions of data migration services.

Email Client Integration

MessageSolution also offers direct email server integration through the Email Client Add-in for Outlook, Lotus Notes, and GroupWise users.

The Email Client Integration Add-In offers:

- Searching & Access to Archived Data Through Email UI
- Seamless Data Offloading from the Email Server
- Offline Archiving

Microsoft Outlook Integration Add-In

MessageSolution Cloud Archive & eDiscovery for Office 365

In addition to enterprise on-premise archiving platform, MessageSolution offers secure and hands-off online archiving solutions. With AES and SSL security, regularly audited SSAE 16 Type II datacenters, and granular user-access control, MessageSolution offers safety and functionalities of online archiving solution without the overhead costs and daily management for the customers. MessageSolution also integrates with major cloud storage options including Microsoft Azure, IBM Cloud, and Amazon EC2, etc.

About MessageSolution

MessageSolution, an industry technology leader in enterprise information archiving and eDiscovery, provides Cloud, on-premise and MSP/ISP-hosted multi-tenant platforms for corporate and datacenter email, SharePoint, and file systems. Managing compliance, legal and storage requirements, MessageSolution is the recipient of multiple industry awards for providing best enterprise and cloud archiving & eDiscovery platforms for global enterprise and SME customers of all sizes across all industries.
